GEEF 2022
Global Engagement & Empowerment Forum on Sustainable Development
Organized by Yonsei University, Seoul, Republic of Korea
February 10 (Thu.) - 11 (Fri.), 2022

REMEMBER OUR COMMON FUTURE
The Global Engagement & Empowerment Forum on Sustainable Development (GEEF), takes place at Yonsei University and is co-hosted by the IGEE, the Ban Ki-moon Foundation for a Better Future and the Ban Ki-moon Centre for Global Citizens (BKMC). The GEEF is an international event where all stakeholders convene to collaborate towards accomplishing the United Nations’ 2030 Agenda for Sustainable Development.

GEEF 2022, as the cornerstone for fulfilling the mission and vision of Sustainable Development Goals (SDGs), is organized under the theme of “REMEMBER Our Common Future”, focusing on examining the progress of Sustainable Development Goals (SDGs) and facilitating discourse on the future directions of SDGs in the post COVID-19 era. GEEF 2022 will take place on February 10-11, 2022; due to the COVID-19 pandemic, the entire event will be live streamed online.
It is my honor to sincerely and genuinely welcome all distinguished guests who participate in the 4th Global Engagement & Empowerment Forum (GEEF) in year 2022 – "REMEMBER OUR COMMON FUTURE."

Due to the Post COVID-19, we are encountering the moment where we must overlook the future for all of us. Here, the necessity of discussing the future of the Sustainable Development Goals (SDGs) in the era of Post Covid is rising with contemplating how the Sustainable Development Goals have historically been accomplished so far. Likewise, Yonsei University, as the one leading the SDGs, shall continue performing social engagement & empowerment required by the domestic and international society.

Therefore, we are truthfully expecting that we may settle a new strategy of the SDGs and discuss our new beginning for the common future of all humankind at the GEEF 2022 as a platform of international cooperation.

Let me express my warm greetings to all of you from Yonsei University, Republic of Korea. Since the outbreak of COVID-19, there have been many changes around us. Although we are still dealing with challenges and obstacles of the pandemic, we are also given a chance and an opportunity to rebuild a better world for a better future. Thus, it is my great pleasure to invite all of you to the 4th Global Engagement & Empowerment Forum (GEEF), under the theme – "REMEMBER Our Common Future."

Yonsei University, the Institute for Global Engagement and Empowerment (IGEE), Ban Ki-moon Foundation for a Better Future, and the Ban Ki-moon Centre for Global Citizens are co-hosting this Forum. The GEEF 2022 will be held online on February 10th and 11th to feature various key messages and discussions on the 2030 Agenda for Sustainable Development in participation of world renowned distinguished guests and speakers from various sectors.

This will be a great opportunity for us to review the progress of SDGs which is vital for a recovery that leads to a greener and better world together. As we move into the post COVID-19 era, it is essential to bring people together and enhance multi-national partnerships that can explore new directions to effectively achieve the SDGs. By leveraging this challenging time, we will foster global partnership among civil society, international organizations, businesses, governments, and individuals and empower various stake-holders for concerted efforts to successfully achieve the SDGs by 2030. Together, we can make this year more hopeful. Together, we can build a sustainable path for our common future. Join us in this noble cause. Thank you very much.

Since 2018, the Global Engagement & Empowerment Forum has served as a gathering place for leaders, experts, and activists to discuss contemporary challenges such as politics, the environment, human rights and the economy, all within the framework of sustainable development. This year’s topic “REMEMBER Our Common Future” is inspired by the Brundtland Report of 1987 of the same title and will consider the evolving concept of Sustainable Development and how it can be pursued in the present while not compromising the needs of future generations. As co-hosts of the forum, the BKMC is looking forward to intergenerational dialogues and a focus on the SDGs to build back better in the wake of the Covid-19 pandemic.
Inaugurated on January 3, 2018, the Ban Ki-moon Centre for Global Citizens is co-chaired by Ban Ki-moon, the 8th Secretary-General of the United Nations, and Heinz Fischer, former President of the Republic of Austria. Based in Vienna, Austria, the Centre is recognized as an independent non-profit, quasi-International Organization under Austrian law. It focuses on empowering women and youth to thrive as global citizens through leadership, mediation, advocacy and education and works within the framework of the SDGs.

The Ban Ki-moon Foundation For a Better Future

The Ban Ki-moon Foundation For a Better Future (the Foundation) was established to serve commitments towards building a world free from conflict and deficiency under the ultimate goal of creating a better future for all. The Foundation aims to do so by following its core values of: Integration, Communication and Coexistence, and Dedication. Therefore, the Foundation intends to play a pivotal role in not only advancing efforts towards building peace and security, accelerating sustainable development, and enhancing gender parity, women’s empowerment and human rights, but also in tackling global conflicts and pursuing action against climate change in line with the aforementioned core values of the Foundation.

The Sustainable Development Goals (SDGs) of the 2030 Agenda for Sustainable Development is a universal call to action to end poverty, protect the planet and ensure that no one is left behind. The SDGs were adopted by world leaders in September 2015 at a historic UN Summit, and officially came into force on January 1, 2016. They build on the success of the Millennium Development Goals, while including new areas such as climate change, economic inequality and innovation. The 17 goals are interconnected, meaning the key to success on one will involve tackling issues more commonly associated with another. While the SDGs are not legally binding, governments are expected to take ownership and establish national frameworks for the achievement of the 17 goals by the year 2030.
PROGRAM AT A GLANCE

DAY 1

Thursday, February 10

09:00 (KST, Feb. 10) | 19:00 (EST, Feb. 9) | 24:00 (GMT, Feb. 9)

REGISTRATION
ON-Line: www.geef-sd.org

09:00 - 09:20 (KST) | 19:00 - 19:20 (EST) | 24:00 - 00:20 (GMT)

OPENING CEREMONY

Master of Ceremony
Hongwon Suh  
Professor of English Literature, Yonsei University

Welcome Remarks by Co-Hosts
Seoung Hwan Suh  
President of Yonsei University
Ban Ki-moon  
The 8th Secretary-General of the United Nations & Honorary Chair of Institute for Global Engagement and Empowerment (IGEE), Yonsei University
Heinz Fischer  
The 11th President of the Republic of Austria & Co-Chair of Ban Ki-moon Centre for Global Citizens (BKMC)

Congratulatory Remarks
Choi Jong-moon  
The 2nd Vice Minister of Foreign Affairs, Republic of Korea

09:30 - 09:50 (KST) | 19:30 - 19:50 (EST) | 00:30 - 00:50 (GMT)

KEYNOTE SPEECH

Amina J. Mohammed  
Deputy Secretary-General of the United Nations

09:50 - 11:30 (KST) | 19:50 - 21:30 (EST) | 00:50 - 02:30 (GMT)

SPECIAL SESSION
TITLE: REMEMBER Our Common Future
HOST: Yonsei University

Ban Ki-moon  
The 8th Secretary-General of the United Nations & Honorary Chair of Institute for Global Engagement and Empowerment (IGEE), Yonsei University
Gro Harlem Brundtland  
First Woman Prime Minister of Norway & Former Director-General of WHO
JH Kah  
Executive Vice President and Chief Innovation Officer of YG Entertainment
Jyotsna Puri  
Associate Vice-President of the Strategy and Knowledge Department, International Fund for Agricultural Development (IFAD)
Kang, Kyung-wha  
Former Minister of Foreign Affairs, Republic of Korea

12:00 - 13:00 (KST) | 22:00 - 23:00 (EST) | 03:00 - 04:00 (GMT)

FEATURED & SCIENTIFIC SESSION 1
TITLE: Quality of Women's Health
HOST: FleishmanHillard

Moderator
Chak Hee Ahn  
Director of Global Affairs, JoongAng Ilbo

Panelists
Jinkyoun Park  
Head of Secretariat, Presidential Committee on Ageing Society and Population Policy (PCASPP)
Jong-Woo Paik

OPENING CEREMONY & KEYNOTE SPEECH
THURSDAY, FEBRUARY 10 at 09:00 – 09:50 KST

Master of Ceremony

Hongwon Suh
Professor of English Literature, Yonsei University

Semee Yoon
Professor of Underwood International College, Yonsei University

Choi Jong-moon
The 2nd Vice Minister of Foreign Affairs, Republic of Korea

Welcome Remarks

Seoung Hwan Suh
President of Yonsei University

Ban Ki-moon
The 8th Secretary General of the United Nations & Honorary Chair of Institute for Global Engagement and Empowerment (IGEE), Yonsei University

Amina J. Mohammed
Deputy Secretary-General of the United Nations

Keynote Speech

Heinz Fischer
The 11th President of the Republic of Austria & Co-Chair of Ban Ki-moon Centre for Global Citizens (BKMC)
Background and Rationale

The COVID-19 pandemic has affected engagement toward Sustainable Development Goals (SDGs). With 2030 closing up every year, it is crucial at this point for us to seek the future directions of SDGs in the post COVID-19 era. 35 years ago in 1987, Our Common Future Report was published under Gro Harlem Brundtland’s leadership. The concept of Sustainable Development (SD) started from this report and it pursues meeting the needs of the present without compromising the resources and ability of future generations.

With Dr. Gro Harlem Brundtland and diverse stakeholders, this discussion aims to touch on the main theme of the forum, “REMEMBER Our Common Future.” The discussion will remind every generation and stakeholders of how sustainable development started in the past and revive the importance of our common effort. It highlights the current state of SDGs and re-examines how all generations can work together for our common future by interacting with the growing generations.

Session Objectives

- To remember how the discussion on Sustainable Development Goals started from the “Our Common Future” Report.
- To share our thoughts on what has changed and remained the same from “Our Common Future” 35 years ago, and how recent few years have affected the global engagement towards SDGs.
- To examine the process of Sustainable Development Goals and remind ourselves of common goals aimed to achieve by 2030.
- To explore how SDGs are being discussed and handled, especially in the cultural business and in the sense of international cooperation.
- To discuss what should be done and expected from each generation and at different business, political, and individual levels.
- To hear the growing generation’s opinions on SDGs and encourage them to engage themselves in meeting our common goals.

Participants

Ban Ki-moon
The 8th Secretary-General of the United Nations & Honorary Chair of Institute for Global Engagement and Empowerment (IGEE), Yonsei University

Gro Harlem Brundtland
First Woman Prime Minister of Norway & Former Director-General of WHO

JH Kah
Executive Vice President and Chief Innovation Officer of YG Entertainment

Jyotsna Puri
Associate Vice-President of the Strategy and Knowledge Department, International Fund for Agricultural Development (IFAD)

Kang, Kyung-wha
Former Minister of Foreign Affairs, Republic of Korea
Women's health is a critical global agenda that must be addressed for sustainable development while being directly connected to the goals set by the UNSDG (3. Good Health and Well-being, 5. Gender Equality 8. Decent 10. Reduced Inequalities). In addition, it is an issue that should go beyond women’s sexual and reproduction-related diseases. It should encompass a woman’s quality of life by considering their environment and their life cycles.

With the spread of COVID-19, personal health, safety, and economic conditions are issues that are becoming more polarized. The “COVID-19 National Health Survey” released by the Ministry of Health and Welfare last year, indicated that the mental health of women in their 20s and 30s, especially those from low-income families, has deteriorated the most. This survey indicates that women’s health is no longer just a healthcare issue, and that it should also be considered a social issue.

Korea entered a lowest-low fertility society since 2002 and is projected to enter a super-aged society by 2025. Although low birth rates and an aging society are emerging as national issues and government budget is being invested, effective policies to overcome this problem are still insufficient. With the national fertility rate hitting an all-time low every year, marriage and childbirth being delayed, and the number of unmarried people increasing, the most important factor to consider is the situation faced by women.

This session aims to tackle the fundamental question of “Why are women reluctant or delaying marriage and childbirth?” FleishmanHillard aims to find the cause of the lowest-low fertility and how to overcome this national crisis by looking at the lives of women from the relevant party’s perspective, with the help of experts analyzing the causes of lowest-low fertility and considering the appropriate policies and measures that should be implemented moving forward.

**Session Objectives**

- Analysis of the Current Status and Causes of Low Fertility in Korea
- Identifying the Current Status of Women’s Physical and Mental Health and Proposing Suggestions to Promote Women’s Health
- Discovering Appropriate Policy Support for the Promotion of Women’s Health in Terms of Quality of Life

**Panelists**

- Jinkyoung Park  
  Head of Secretariat, Presidential Committee on Ageing Society and Population Policy (PCASPP)
- Jong-Woo Paik  
  Professor of College of Medicine, Kyung Hee University & Chairman of Korean Society for Traumatic Stress Studies (KSTSS)
- Ja-Young Kwon  
  Professor of Obstetrics and Gynecology (Maternal-Fetal-Medicine), College of Medicine, Yonsei University
- Chounsook Jung  
  21st National Assembly Member, Chairwoman of the National Women’s Committee of the Democratic Party of Korea

**Moderator**

Chak Hee Ahn  
Director of Global Affairs, JoongAng Ilbo
The global pandemic, the outbreak of COVID-19 caused many challenges amongst global citizens and governments, medical professionals, and pharmaceutical companies. Indeed, the most effective response to the global pandemic has been vaccination. Looking through the lens of the Sustainable Development Goals, the world has made unprecedented efforts and progress to ensure global equitable vaccine access and successful vaccine implementation and uptake, through COVAX for example.

However, the last few years demonstrated that vaccine development alone could never be sufficient to withstand infectious diseases. While the development of the vaccine is in the domain of medicine and bio-tech, policy and social solidarity are the main enablers of equitable vaccine distribution and access. As the pandemic greatly disrupted supply and logistics including the cold chain, many governments were mounted with pressure to secure supplies for their population. Moreover, combatting vaccine misinformation and uncertainties arising from the pandemic has become an essential component of the COVID-19 response.

Together with diverse stakeholders, this session discusses various issues revolving around vaccine and vaccination. These include publicity and intellectual property rights of vaccine at its development stage, multilateral cooperation and partnership in vaccine logistics, and public communications and national vaccine policy. Furthermore, the discussion highlights what goes behind the scenes of the COVID-19 pandemic and promising practices for the next pandemic for our GEEF participants.
On October 31st, 2017, Yonsei University and Korea Foundation for Advanced Studies signed the Memorandum of Understanding on the ‘Project for the Promotion of Future Social Innovation.’ As of March 1st, 2018, the Institute for Higher Education Innovation was officially launched as an organization directly responsible to the university president, thereby suggesting the highest level of commitment on campus for fostering future talent and developing a driving force for innovation in higher education.

‘Workstation’ is a term used as team-based unit for student-led extracurricular program run by Institute for Higher Education Innovation, where students who are willing to make meaningful changes in the society, develop their own projects and ideas to initiate future social innovation.

---

**Session Objectives**

- To share and inform students’ activities and achievements for SDGs
- To discuss how SDGs 13 and 14 can be achieved in the post COVID-19 era
- To allow panelists to communicate with the audience about the SDGs

**Co-Moderators**

- **Jayun Won**  
  President of Social Innovation Creators’ Academia (SICA) & Undergraduate Student of Underwood International College, Yonsei University

- **Soomin Hong**  
  Vice President of Social Innovation Creators’ Academia (SICA) & Undergraduate Student of Underwood International College, Yonsei University

**Panelists**

- **Kunhee Ryu**  
  Data Team Manager of Recoffery & Undergraduate Student of Underwood International College, Yonsei University

- **DongJun Ko**  
  Strategy Associate of Recoffery & Undergraduate Student of Underwood International College, Yonsei University

- **Yelim Hong**  
  Research Associate of Recoffery & Undergraduate Student of Underwood International College, Yonsei University

- **Jeesoo Park**  
  Team Leader of SOLVERE & Undergraduate Student of Underwood International College, Yonsei University

- **Huiju Lee**  
  Planning Team Leader of SOLVERE & Undergraduate Student of Underwood International College, Yonsei University

- **Boyun Choi**  
  Member of SOLVERE & Undergraduate Student of Underwood International College, Yonsei University
Global Citizenship for a Sustainable Tomorrow: from Policy to Action

Background and Rationale

Education is fundamental to developing the capacity of today’s youth to act as global citizens for a sustainable world. With mounting global challenges including climate change, enduring conflicts, gender inequality, and a global pandemic, promoting global citizenship is more vital than ever before.

Policymakers and educators are already taking action to integrate Global Citizenship Education (or GCED) into curricula around the world. GCED seeks to, “empower learners of all ages to assume active roles, both locally and globally, in building more peaceful, tolerant, inclusive, and secure societies.” It aims to influence learning in three key areas – cognitive, social-emotional, and behavioral with the goal of equipping learners with not only the knowledge but also the skills, values, and behaviors necessary to forge a sustainable future for all. ‘Transformative Education’ often combines GCED with Education for Sustainable Development (ESD) and the development of 21st Century Skills and can serve as an overarching term for this approach to education.

The Ban Ki-moon Centre for Global Citizens (BKMC) is a leader in promoting GCED and fostering youth-led action for the UN Sustainable Development Goals (SDGs) based on global citizen values. The Centre is currently part of an initiative entitled ‘Mission 4.7’ along with UNESCO, the Sustainable Development Solutions Network (SDSN), Columbia University, the Global Schools Program, and the Pontifical Academy of Sciences (with the support of the Vatican). The initiative encourages and supports governments as well as educators in adopting GCED and Transformative Education in their policies and practices. Furthermore, the Centre implements its own grassroots-level programs that educate, empower, and build the capacity of youth and women to act as global citizens in their communities. As a part of their training, these young change-makers develop and run their own specialized SDG Micro-Projects in their communities, addressing challenges with solutions. To date, the BKMC has trained over 200 young leaders who have implemented 170 SDG Micro-Projects which in turn have reached over 730,000 people on the ground.

Following welcoming remarks by the 11th President of the Federal Republic of Austria and Co-chair of the Ban Ki-moon Centre, H.E. Heinz Fischer, the moderated and interactive session will constitute of two main segments:
1. The first segment will feature policymakers and education leaders who will share best practices for implementing GCED and Transformative Education at the policy level.
2. The second segment will consist of a panel discussion spotlighting young change-makers and alumni of the BKMC’s leadership training programs who have undertaken global citizen actions in their communities (SDG Micro-Projects).

The panel segment will include a short Q&A with the audience. Furthermore, the tool “Mentimeter” will be utilized during the session to facilitate audience engagement via real-time polling.

Overall, this 90-minute session aims to underline the importance of instilling global citizenship through GCED (enshrined in SDG 4, target 4.7) and inspire all of us to act for a sustainable tomorrow.

2. https://www.mission4point7.org/
**Session Objectives**

- Discuss the importance of GCED and highlight why SDG 4, particularly 4.7, needs to be prioritized.
- Share best practices, experiences, challenges, and opportunities for GCED policy implementation and youth action for the SDGs.
- Discuss what is needed for global citizenship to thrive in different countries, communities, and contexts.
- Inspire others to act as global citizens for the SDGs.

**Co-Moderators**

- Katrin Harvey: COO of Ban Ki-moon Centre for Global Citizens (BKMC)
- Julia Zimmerman: Program Officer of Ban Ki-moon Centre for Global Citizens (BKMC)

**High-Level Speakers**

- Heinz Fischer: The 11th President of the Republic of Austria & Co-Chair of Ban Ki-moon Centre for Global Citizens (BKMC)
- Ban Ki-moon: The 8th Secretary-General of the United Nations & Honorary Chair of Institute for Global Engagement and Empowerment (IGEE), Yonsei University
- Niki Kerameus: Minister of Education and Religious Affairs, Greece
- Vibeke Jensen: Director of the Division for Peace and Sustainable Development, UNESCO
- Sam Loni: Program Director, UN Sustainable Development Solutions Network (SDSN) & Director of Global Schools
- Ramu Damodaran: First Chief of United Nations Academic Impact (UNAI)

**International Youth Panelists**

- Gilian Ndlovu: Global Citizen Scholar 2021, Ban Ki-moon Centre for Global Citizens (BKMC)
- Rosario Diaz Garavito: Global Citizen Fellow 2021, Ban Ki-moon Centre for Global Citizens (BKMC)
- Shireen Shehzad Bhamani: Global Citizen Mentee 2021, Ban Ki-moon Centre for Global Citizens (BKMC)
ICT Systems in the Age of Aging

Improvements in Information and Communication Technology (ICT) system design have catalyzed its use in various application fields. Given their ubiquitous deployments to wide populations, ICT-based systems can be extended towards addressing various social challenges. Specifically, for the fastly aging global population, ICT systems can contribute in increasing the quality of life in various aspects. This session will bring together world-leading researchers that focus on designing and deploying ICT systems for supporting the aging population. This panel session will discuss questions such as the direction of ICT system development for addressing the real-world needs of the elderly, introduce examples of such ICT systems and discuss what considerations need to be made to design practically useful ICT systems.

Session Objectives
- Discuss the direction of ICT system development for supporting the aging population
- Share opinions and considerations that need to be made for designing practically applicable systems
- Identify SDGs that can be addressed using ICT systems for the aging

Related SDGs
- SDG 3 Ensure healthy lives and promote well-being for all at all ages
- SDG 9 Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation
- Target 9.c. Significantly increase access to information and communications technology and strive to provide universal and affordable access to the Internet in least developed countries by 2020
- SDG 17 Strengthen the means of implementation and revitalize the global partnership for sustainable development
- Target 17.16 Enhance the global partnership for sustainable development, complemented by multi-stakeholder partnerships that mobilize and share knowledge, expertise, technology and financial resources, to support the achievement of the sustainable development goals in all countries, in particular developing countries

Moderator
JeongGil Ko
Associate Professor of School of Integrated Technology, College of Engineering, Yonsei University

Panelists
Jie Liu
Dean of AI Research Institute, Harbin Institute of Technology (Shenzhen)

Cecilia Mascolo
Professor of Mobile Systems, University of Cambridge

Sozo Inoue
Professor of Kyushu Institute of Technology

Moon Choi
Associate Professor of Graduate School of Science and Technology Policy, KAIST
Firms, Society, and ESG

Background and Rationale

Firms have interacted with the society. Different ages have varying social expectations about the role of firms. Corporate social engagement has evolved into emergence of corporate ethics. Leading firms receive much attentions. As Korean firms increase global presence, it is necessary that firms should start to think the sustainable development goals (SDGs) in diverse formats and names, based on own vision and culture. Pursuit of SDGs, however, presents challenges in managing cross-border transactions. At the same time, the social expectations and the rationale are not completely clear.

While global threats such as climate changes and COVID-19 affect all countries, countries have own needs for corporate engagement in the social issues. Korean firms in the midst of globalization consider the SDGs, starting to discuss what Korean firms can do for the domestic and global societies. This session is hosted by School of Business (Brain Korea 21), providing an opportunity of thinking about the nexus between the firms and the society.

Session Objectives

Firms are an important actor in the SDG-related activities. This session presents the blue prints that participant firms show for our future, and discusses the role of the firms in the society in order to achieve the SDGs.

Moderator

Im Il
Professor of School of Business, Yonsei University & Head of Brain Korea 21

Panelists

Eun Jung Kim
Vice President of Social Value Committee, SK SUPEX Council

Park, Sung Gyu
Vice President of Hyundai Motor Group

Jeonghwa Oh
Senior Vice President of Management Sustainability Division, Amore Pacific

Dongyoub Shin
Professor of School of Business, Yonsei University

Hyun-Han Shin
Professor of School of Business, Yonsei University

Jooyoung Kwak
Professor of School of Business, Yonsei University & Director of Center for Global Sustainability, Institute of Global Engagement and Empowerment (IGEE)
Background and Rationale

International organizations have been the main actors in global sustainable development activities. We are now facing more threats that urgently call for transnational cooperation and they are not only the natural or pandemic crises such as climate change or COVID-19, but also include economic polarization and poverty, social conflicts, or political/military tension. In these circumstances, the role of international organizations gains more importance in initiating and implementing sustainable development goals beyond the national boulders.

In shaping our common future, international organizations are an essential engine for aid and cooperation. However, the individual nations are replacing the role of international organizations under the pandemic disease. In addition to COVID-19, global societies are being digitally transformed. What would international organizations do in the future? This session is designed to have an in-depth discussion about the orientation and roles of international organizations for our common future.

Session Objectives

This session inquires the role of international organizations in the future, addressing the following questions:

• What should be the role of international organizations to reduce the digital gap in the world?
• How should international organizations cooperate with the state and civil society in the process of digitalization?
• How should international organizations re-align local partnerships with individual nations?
• From the perspective of international organizations, what should be the keywords for Korea’s development and cooperation?

Moderator

Yeonho Lee
Professor of Political Science & Dean of Social Science College, Yonsei University

Panelists

Mahmoud Mohieldin
Executive Director of International Monetary Fund (IMF)

Thomas Abell
Chief of Digital Technology for Development Unit, Asian Development Bank (ADB)

Julitta Onabanjo
Director of Technical Division, United Nations Population Fund (UNFPA)

Hyoeun Kim
Ambassador and Deputy Minister for Climate Change, Ministry of Foreign Affairs, Republic of Korea

Heejin Lee
Professor of Graduate School of International Studies, Yonsei University & Former President of Korea Association of International Development and Cooperation

Jooyoung Kwak
Professor of School of Business, Yonsei University & Director of Center for Sustainable Development, Institute of Global Engagement and Empowerment (IGEE)
In recent years, Artificial Intelligence (AI) and its subset applications such as machine learning (ML) and deep learning (DL) have gained widespread attention, as well as some skepticism about its major promises in increasing productivity and efficacy in activities previously undertaken by humans. AI can be divided into two types: narrow and general. General AI describes a type of application that effectively replicates the processes of a human brain without any human intervention. This is the type of AI usually depicted in popular media, which has often led to suspicion by the general public. However, this type of AI is at present theoretical and there are no applications in use today. The type of AI that surrounds us is Narrow AI, which is trained to perform specific tasks under human supervision. Some AI capabilities include object recognition, decision making, problem solving, understanding language, learning from examples, and other combinations or variations of these.

Intergovernmental organizations, governments, industry and academia are all engaging in different AI applications for sustainable development. However, we must avoid fragmented efforts and recognize the need to empower one another. The Featured Session will offer a platform to discuss current activities and possible directions for mutually empowering partnerships among different stakeholders to deploy AI solutions that can accelerate the achievement of the SDGs.

For the purpose of sustainable development, AI can serve as a valuable tool to keep track of SDG achievement and help arrive at the best decisions that take into account multiple societal, environmental and economic considerations. Many movements have emerged from this opportunity, such as AI for social good and AI for sustainability, as well as more focused activities like machine learning applications for climate change.

Some misdirected applications of AI could result in higher income inequality, narrower work opportunities, and concerns for personal privacy. Yet, we must be reminded that technological advancement does not occur spontaneously but is steered by human intention and need. The international community has already agreed upon by all member countries and several partner countries.

Borrowing from the case of Korea, we can observe how different actors—government, industry and academia are engaging in AI to serve society. In 2017, the Korean government established the Presidential Committee on the Fourth Industrial Revolution, with the mandate to suggest policies pertaining to AI and other data technology. A leading example of industry’s work in AI is that of NAVER LABS, which recently created a 3D model of Seoul and mapped all of its roads, enabling the development of safer and more efficient transportation services, and thus bringing positive benefits to the city’s population. Yonsei University has also gone beyond and integrated AI-based solutions to its very own Yongin Severance Hospital, part of the Yonsei University Health System.

The case of Korea portrays how multiple actors can engage and empower one another at the national level. On an international level, there are also many critical issues that call for the engagement and empowerment of different stakeholders in the AI and development spheres. A recent and vivid example is the COVID-19 pandemic and related issues, such as vaccine development and distribution. With global issues in mind, panelists are encouraged to discuss current and future approaches for international and interdisciplinary cooperation.

**Session Objectives**

- Introduce current efforts by early career academics, intergovernmental organizations, government and industry partners who work on utilizing latest science, technology and innovation to achieve the SDGs.
- Share lessons learned from offering interdisciplinary research and education of SDGs at higher education institution.
- Examine actionable ways to overcome the short-term oriented trend in collaborations in AI for SD and move towards more sustained and deeper partnerships.
- Discuss the role of intergovernmental organizations in establishing global regulations on the use of AI and how to encourage policy co-creation with other stakeholders.
- Explore strategies to align private sector activities in AI with the achievement of the SDGs, balancing the creation of monetary revenue as well as positive returns to society and the environment.
- Present successful cases of AI applications to address global issues. For example, use of AI to help develop COVID-19 vaccines and determine distribution.

**DAY 1 | FEATURED & SCIENTIFIC SESSION 7**

**THURSDAY, FEBRUARY 10 at 21:30 – 22:30 KST**
DAY 2
FRIDAY
FEBRUARY 11
Global Health and Partnerships to Further Our Common Future: Where We Are and Where We Should Be
The Importance of Global Health and Institutional Collaboration with Perspectives From South Korea and The United States (SDGs 3 and 17)

Background and Rationale
The COVID-19 pandemic has highlighted the "global" aspect in the field of global health, reinforcing the concept of interconnected health issues and the need to engage with health systems past the regional and national levels. Rather than relying on isolated initiatives, health challenges should be approached with strategies that embrace a multidisciplinary and collaborative spirit.

Institutional cooperation is one such strategy, offering the diverse perspectives and resources needed to tackle pressing health issues. Strong institutional cooperation has the potential to advance innovation and research, promote data and knowledge sharing, and encourage reflexive assessments of methodology and ethics, valuable tools for the strengthening of health systems and outcomes. This panel will discuss the role of global health and cooperation from the perspectives of South Korea and the United States.

Key points and topics will include but are not limited to:
- The importance of the "global" aspect of global health.
- The current state and milestones of global health in South Korea/United States within the context of COVID-19.
- Potential benefits and pitfalls of institutional collaboration.
- The current state of institutional collaborations in South Korea/United States within the context of COVID-19.
- Best practices for effective research, innovation, and knowledge sharing.
- Future directions and areas of focus for the continuous promotion of health and well-being.

Ensuring healthy lives and promoting strong partnerships remain central objectives in the United Nation's Sustainable Development Goal framework. Fostering a greater appreciation for global health and institutional collaboration will be invaluable for achieving these objectives and ensuring a resilient and secure society in the future.

Session Objectives
- Discuss certain topics, issues, challenges
- Emphasize the importance of global health and institutional collaboration for advancing health outcomes and strengthening health systems.
- Share opinions on certain topics, issues, challenges
- Provide perspectives and discuss the current state of global health and institutional collaboration from the perspective of South Korea and the United States, within the context of COVID-19.
- Allow speakers to communicate on certain topics, issues, cases, challenges
- Discuss best practices for effective collaboration from the South Korean and US perspectives. Provide future directions and focus areas for global health and collaboration.
- Highlight which SDGs may need to be prioritized
- Relate topics to SDGs 3 and 17

Sten Vermund
Professor of Yale School of Public Health & Yale School of Medicine
Two years in the Pandemic have forced us to face the reality of our prosperity and inequality threatening the sustainability of society, not just the poorest but also the wealthiest. There is growing awareness of our fundamental interconnectedness, which makes no one safe and well until everyone is safe and well. However, our old way of thinking often hinders more creative and productive discussion to further the insight. We need better perspectives and ideas to discuss the shared future of us as human beings who are fundamentally interconnected through care for each other from birth to death and from family to village, local and global. <REMEMBER Our Common Future> begins with re-membering that we are all members of a community of which vitality and sustainability depend on the act of care, as it is care that enables even the most rudimentary relationship among human beings and beyond. We need a clearer vision to bring to the forefront of the public agenda about what is so essential yet so taken for granted that has been put aside and devalued. For the past couple of decades, we have seen discussions on care as alternative social ethics and aesthetics emerged in various ways not just in public policy but in different fields such as Economics, Political Science, and even Contemporary Arts. This plenary session brings together such intellectual and artistic endeavors to share the newest insight and have a vivid conversation among surprisingly diverse disciplines and fields of practice. It will be a session that can inspire how we can rethink economy, democracy, art, and technology by the principle of care instead of control or competition and how it can contribute to social sustainability for our common future.
Background and Rationale

Sustainable Development Goals are essential goals that outline a global plan for an economically, environmentally, and socially sustainable future. But in 2015, when the SDGs were adopted by the United Nations, nobody had expected COVID-19 to have the global impact that it has today. Therefore, it is important to revisit the 17 Sustainable Development Goals and explore their relationship with the pandemic.

This plenary session aims to provide a place to discuss the various ways, namely five, in which innovative scientific methods and indexes can help organizations and communities assess and overcome difficulties caused by COVID-19.

The indexes that will be discussed are the following: Smart City, Artificial Intelligence Rankings, Peace, Urban Regeneration, and THE University Impact Rankings. Smart City Indexes will focus on presenting key success factors in realizing a leading smart city in the post COVID-19 era through technological innovation. Artificial Intelligence Rankings will present AI-based analysis results on the SDG achievement levels of various academic institutions using qualitative data as input. Urban Regeneration Index will touch on why communicative indicators should be added to the list of indicators of urban regeneration. Finally, THE University Impact Rankings will discuss how its new Impacts Ranking will focus on universities' contributions to the UN Sustainable Development Goals.

Session Objectives

• Share ways in which Smart City Index can assist the realization of SDGs.
• Discuss how Artificial Intelligence Rankings can contribute to the SDG effort.
• Highlight how the Peace Index is important in achieving SDGs.
• Elaborate on the impact of Urban Regeneration Index on SDGs.
• Communicate on the relationship between THE University Impact Rankings and SDGs.

**Background and Rationale**

This session, targeted at SDG 14: Life below water, focuses on the role of ports in sustainable development. A port geographically connects land and sea; therefore, it is an important area in which to harmonize sustainable development of the land and the ocean and to create a synergistic effect between the two.

The marine environment can be protected only when land-based pollutants are prevented from entering the sea. The role of the port, which is the end of the land and the beginning of the sea, is therefore crucial for marine environmental protection.

Ports are also important places for maritime industries such as shipping and fishing and blue economy. It is thus essential to discuss how to harmonize environmental and business concerns related to ports.

**Session Objectives**

Various actors at ports (port cities, port authorities, international organizations, etc.) may engage in achieving SDG 14. This session shares and discusses the manner in which these actors individually or collectively contribute and can contribute to sustainable development.

**Moderator**

Hyun Jung Kim  
Professor of Department of Political Science & International Studies, Yonsei University

**Panelists**

Jong-Gil Kim  
Vice President of Incheon Port Authority

Taedong Lee  
Professor of Department of Political Science & International Studies, Yonsei University

Noel Hacegaba  
Deputy Executive Director & Chief Operating Officer, Port of Long Beach, California, U.S.A.

Sukhui Lee  
Deputy General Manager of Korea Marine Environment Management Corporation (KOEM)

Hyongmo Jeon  
Director & Research Fellow of Korea Maritime Institute (KMI)
Even in the middle of the COVID-19 pandemic, a Korean wave represented by the music of BTS, the movie Parasite, and the Netflix drama Squid Game broke world records and won top prizes. With the sweeping popularity of Korean popular culture known as the Korean wave, studies of the Korean language, culture, art, and history are unprecedentedly at the center of global attention.

Although the Korean wave has demonstrated its soft power as a vehicle of nation branding, its transnational and transcultural effect can be more powerful and enhanced by facilitating communication among new generations of Millennials and Gen Z.

This panel focuses on the interactive and interpersonal function of language and culture connecting people to people and the planet and addresses how the study of Korean language and culture can promote dynamic engagement and empowerment among youth and be transformative as we move forward in our common future SDGs. The panel presentations will highlight the status of the Korean language emerging as one of the World Languages and its potential as means of dialogue for non-proliferation and environmental sustainability.

We will also analyze the innovative language of K-pop and new discourses evolving through global K-pop artists and fandom such as the BTS Army that can be aligned with imminent global issues of anti-racism, gender equality, diversity, education, socioeconomic and political justice, and the environment. The panel session will address empirically how the Korean language and culture can be integrated and further developed to support the future of SDGs as an effective tool across new modes of digital communication in the post-COVID-19 era.
Background and Rationale

The Sustainable Development Goals (SDGs) include economic, peaceful, environmental, and security areas not covered by the Millennium Development Goals (MDGs). It also emphasizes the need for an integrated approach that considers not only societal development but economic development and environmental sustainability for sustainable development. Additionally, it urges all countries, including developed, developing, and underdeveloped countries, to strive for the prosperity of mankind while protecting the environment at the same time. Furthermore, it emphasizes the partnership of various stakeholders to achieve the Sustainable Development Goals, and it discusses as high importance the participation of civil society, private companies, charities, and assembly.

Specifically, the reason participation of civil society is of high importance is because the participation and interest of each citizen are crucial in achieving the comprehensive target of the Sustainable Development Goals. Civil society has the advantage to solve the problems the international community is facing by instilling ownership of those problems as global citizens. Civil society works closely with the local community and is committed to promoting the participation and decision-making of local residents. In addition, when it comes to solving community problems, civil society has an active attitude in establishing partnerships with various stakeholders and leading collaboration with them.

Through this session, we want to discuss the efforts the civil society is making to ensure we face “Our Common Future” where we ‘leave no one behind’ and the challenges that will require more collaboration.

Session Objectives

• Reflect on the participation and significance of civil society in the process of establishing the Sustainable Development Goals (SDGs).
• Discuss the changes the humanitarian crisis, climate change, and the COVID-19 pandemic have brought to the community.
• Summarize the roles and tasks of civil society for achieving the Sustainable Development Goals (SDGs) based on the identity and strength of civil society.

Moderator

In Han Song
Professor and Vice President for Student Affairs & Director of Ban Ki-moon Center for International Cooperation, Yonsei University

Panelists

Daeshik Jo
Secretary-General of Korea NGO Council for Overseas Development Cooperation (KCOC)

Joon Oh
Board Chair of Save the Children Korea

Myung Hwan Cho
President & CEO of World Vision Korea

Wonsik Yoo
President of Korea Food for the Hungry International (KFHI) & Vice President of Korea NGO Council for Overseas Development Cooperation (KCOC)
Background and Rationale

- Access to healthcare services is critical to good health, yet rural residents face various access barriers.
- For rural residents to have sufficient access, appropriate healthcare services must be available in a timely manner.
- This session will 1) discuss the status quo and challenges to providing essential health care in a rural area; 2) share the story of Kenyan doctors who moved to the rural area to serve the local people instead of working in the advanced hospital.
- The panelists will share their experiences and inquire how to serve in the rural area.

Session Objectives

- To share information and experiences in serving medically underserved communities.
- To discuss how to fulfill essential health services needs in rural communities.
- To facilitate networking to share knowledge and experiences and encourage each other.

Director of International Program, Medical Mission Center, Yonsei Institute for Global Health, YUHS
President Seoung Hwan Suh is the current President of Yonsei University. After receiving his bachelor’s degree and master’s degree in Economics from Yonsei University, President Suh received his doctorate in Economics from Princeton University. Since beginning his professorship at Yonsei University in 1996, he has held various senior administrative positions, including Chair of the Department of Economics, Director of the Economic Research Institute, and Vice President for University Planning and Management. In particular, President Suh had made significant contributions to establishing the foundation of Yonsei International Campus in Songdo, Incheon, which opened in 2011, as Vice President of University Planning & Development of International Campus during 2006-2012 and Vice President of the International Campus in 2012. He also served the Korean government as Minister of Land, Infrastructure and Transport during 2013-2015.

In April 2019, Mr. Ban was elected as the Chairman of the Presidential National Council on Climate and Air Quality (NCCA). In April 2018, Mr. Ban was elected as the Chairman of Boao Forum for Asia. In January 2018, Mr. Ban, along with former President of Austria Mr. Heinz Fischer, were inducted as Co-Chairs of the Ban Ki-moon Centre for Global Citizens in Vienna, Austria. Mr. Ban Ki-moon was also elected as Chairman of the IOC Ethics Committee in September 2017. Currently, he is the Distinguished Chair Professor and Honorary Chairman at the Institute of Global Engagement & Empowerment at Yonsei University in Seoul, Korea. In February 2018, he was elected and has been serving as the President of the Assembly & Chair of the Council of Global Green Growth Institute (GGGI).

In April 2019, Mr. Ban was elected as the Chairman of the Presidential National Council on Climate and Air Quality (NCCA). In April 2018, Mr. Ban was elected as the Chairman of Boao Forum for Asia. In January 2018, Mr. Ban, along with former President of Austria Mr. Heinz Fischer, were inducted as Co-Chairs of the Ban Ki-moon Centre for Global Citizens in Vienna, Austria. Mr. Ban Ki-moon was also elected as Chairman of the IOC Ethics Committee in September 2017. In February 2018, he was elected and has been serving as the President of the Assembly & Chair of the Council of Global Green Growth Institute (GGGI).

Prior to these appointments, Mr. Ban served two consecutive terms as the Secretary General of the United Nations (2007-2016). Throughout his tenure at the UN, Mr. Ban strove to be a bridge builder, to give voice to the world’s poorest and the most vulnerable people, and to make the Organization more transparent and effective. He successfully pressed for action to combat climate change - an effort that culminated in the adoption and rapid entry into the landmark Paris Agreement in 2016. Mr. Ban worked closely with member states of the UN to shape the 2030 Agenda for Sustainable Development and to establish UN Women, which has been advancing the Organization’s work for gender equality and women’s empowerment. Mr. Ban also launched major efforts to strengthen UN peace operations, to protect human rights, to improve humanitarian response, and to prevent violent extremism and to revitalize the disarmament agenda.

At the time of his appointment at the UN, Mr. Ban was the Minister of Foreign Affairs and Trade of the Republic of Korea. His 37 years with the Ministry included postings in New Delhi, Washington D.C., and Vienna, and responsibilities for a variety of portfolios, including Foreign Policy Adviser to the President, Chief National Security Adviser to the President, Vice Minister, Deputy Minister for Policy Planning and Director-General for American Affairs. Mr. Ban has also been actively involved in issues relating to inter-Korean relations by serving as Chairman of the Preparatory Commission for the Comprehensive Nuclear Test Ban Treaty Organization. Mr. Ban received a bachelor’s degree in international relations from Seoul National University in 1970. He earned a master’s degree in public administration from the John F. Kennedy School of Government at Harvard University in 1985.
Amina J. Mohammed is the Deputy Secretary-General of the United Nations and Chair of the United Nations Sustainable Development Group.

Prior to her appointment, Ms. Mohammed served as Minister of Environment of the Federal Republic of Nigeria where she steered the country’s efforts on climate action and efforts to protect the natural environment.

Ms. Mohammed first joined the United Nations in 2012 as Special Adviser to former Secretary-General Ban Ki-moon with the responsibility for post-2015 development planning. She led the process that resulted in global agreement around the 2030 Agenda for Sustainable Development and the creation of the Sustainable Development Goals.

Ms. Mohammed began her career working on the design of schools and clinics in Nigeria. She served as an advocate focused on increasing access to education and other social services, before moving into the public sector, where she rose to the position of adviser to three successive Presidents on poverty, public sector reform, and sustainable development.

Ms. Mohammed has been conferred several honorary doctorates and has served as an adjunct professor, lecturing on international development. The recipient of various global awards, Ms. Mohammed has served on numerous international advisory boards and panels. She is the mother of six children and has two grandchildren.

Heinz Fischer, 11th President of the Republic of Austria (2004 – 2016), has had an extensive career as a senior representative and policymaker of the Republic of Austria. As Federal Minister of Science and Research and as speaker of the Austrian National Assembly for more than 12 years, Dr. Fischer was involved extensively in supporting and advancing the country’s scientific, social, and cultural development. He was re-elected in 2010 and retired in July 2016, after more than 40 years in public office and two terms as Federal President. After completing two terms as head of state Dr. Fischer was teaching as a professor for political science at the University of Innsbruck and was proclaimed Chairman of the Council for the Commemorative Year 2018 by the Federal Government of Austria. Furthermore, in June 2016 Heinz Fischer was named president of the Association of Austrian Adult Education Centers. Since September 2016 he occupies the position as president of the Austrian Society for Chinese Studies and as of January 2017, he is president of the Board of the Institute for Human Sciences.

Choi Jong-moon is the 2nd Vice Minister of Foreign Affairs of the Republic of Korea since December 2020. He joined the Ministry of Foreign Affairs in 1983 as a career diplomat, served at the Korean Permanent Observer Mission to the United Nations in New York, Korean Embassies in Thailand, the United States of America, Myanmar, and was Ambassador to Sri Lanka and France. Before becoming the 2nd Vice Minister of Foreign Affairs, he was Special Advisor to the Minister, Sherpa for the Nuclear Security Summit as well as Deputy Minister for Multilateral and Global Affairs.

He received his BA in Political Science and International Relations from Yonsei University and his MA in International Relations from the University of Southern California.

He successfully pressed for action to combat climate change - an effort that culminated in the adoption and rapid entry into the landmark Paris Agreement in 2016. Mr. Ban worked closely with member states of the UN to shape the 2030 Agenda for Sustainable Development and to establish UN Women, which has been advancing the Organization’s work for gender equality and women’s empowerment. Mr. Ban also launched major efforts to strengthen UN peace operations, to protect human rights, to improve humanitarian response, and to prevent violent extremism and to revitalize the disarmament agenda.

At the time of his appointment at the UN, Mr. Ban was the Minister of Foreign Affairs and Trade of the Republic of Korea. His 37 years with the Ministry included postings in New Delhi, Washington D.C., and Vienna, and responsibilities for a variety of portfolios, including Foreign Policy Adviser to the President, Chief National Security Adviser to the President, Vice Minister, Deputy Minister for Policy Planning and Director-General for American Affairs. Mr. Ban has also been actively involved in issues relating to inter-Korean relations by serving as Chairman of the Preparatory Commission for the Comprehensive Nuclear Test Ban Treaty Organization. Mr. Ban received a bachelor’s degree in international relations from Seoul National University in 1970. He earned a master’s degree in public administration from the John F. Kennedy School of Government at Harvard University in 1985.

Dr. Gro Harlem Brundtland is a former Prime Minister of Norway who served three terms and was the Director-General of the World Health Organization in 1998. She was also a Special Envoy of the UN Secretary-General on Climate Change in 2007. During her second term as a Prime Minister, Dr. Brundtland chaired the World Commission on Environment and Development (WCED), better known as the Brundtland Commission, and submitted the report entitled ‘Our Common Future’, to the UN. The report has become the fundamental basis for SDGs.

As a founding member of The Elders, Dr. Brundtland champions health as a human right and puts sustainable development on the international agenda. She is a globally recognized voice on public health, environment, gender equality and sustainable development.

As the current Executive Vice President and Chief Innovation Officer at YG Entertainment, JH’s role includes heading up group effort in strategy implementation, digital transformation and risk management. YG Entertainment is a globally recognized entertainment company representing artists such as Big Bang, Blackpink, Winner and Ikon. Before joining YG Entertainment, JH was Chief Strategy Officer at Hyosung Group and President of SK Planet International. He also served as CEO of Lycos Korea until it merged with SK Communications in 2002. JH also worked as an attorney at Skadden, Arps, Meagher and Flom LLP’s New York and Hong Kong office, specializing in M&A and corporate finance in the telecommunication and technology sector. JH holds a JD from New York University, an MBA from the University of Chicago, and a BA in Business Administration from Yonsei University in Korea.
**SPEAKER BIOGRAPHY**

**THURSDAY, FEBRUARY 10 at 09:50 – 11:30 KST**

**Chak Hee Ahn**  
**Director of Global Affairs, JoongAng Ilbo**

Chak Hee Ahn is a journalist with more than 20 years of experience in TV news reporting and anchoring. She is credited with having launched Korea’s first English-language TV news program in 1995 at YTN, Korea’s first 24-hour news channel. She has extensive experience in news-gathering and live reporting, program production, and management of news teams. As director of global affairs, she now oversees all planning and execution of international conferences and communications with foreign partners for the JoongAng Ilbo, the flagship newspaper of the JoongAng media group, Korea’s largest media conglomerate. Previously, she was the head of the JTBC Foreign Affairs & Security Team. In that capacity, she oversaw JTBC’s coverage of Kim Jong-il’s sudden death in December 2011, just weeks after JTBC’s launch. She planned and oversaw hours-long special broadcasts on North Korea’s missile launches and nuclear tests. As the director of news at Arirang TV, Korea’s all-English channel watched in 180 countries around the world, Ahn was responsible for all news production with budget and personnel management duties. She was also the longest serving anchor of the channel’s flagship evening news program. Ahn received the Special Award at the 11th Annual Korea Women Leaders Awards in 2013, the Service Merit Medal in 2006, and the Woman of the Year Award by the Korean National Council of Women in 2006. Ahn received her B.A. from Yonsei University and both her M.A. and Ph.D. in Communication from the University of Massachusetts.

**Jyotsna Puri**  
**Associate Vice-President of the Strategy and Knowledge Department of IFAD**

Jyotsna Puri (or Jo) is the Associate Vice-President - Strategy and Knowledge Department (SKD) at IFAD. She leads the organization’s strategy work in IFAD’s key areas targeting agriculture, climate, gender, nutrition, youth and social inclusion. Puri provides the vision for evidence-informed advice on program designs and implementation, contributing to resource mobilization, and supporting IFAD’s global remit in providing state-of-the-art policy advice related to these topics. Puri has worked previously at the Green Climate Fund, 3ie, UNEP, the World Bank and UNDP. She is also an adjunct associate professor at Columbia University, New York where she was also a research scientist. She has published in many academic journals and written for newspapers and provided advice as a board member to several development organizations. In 2019, Puri was selected as one of 16 women who have shown leadership in restoring the earth through their efforts, by the Global Landscape Forum. She holds a PhD and MSc in Agriculture and Resource Economics and an MA in Development Economics.

**Kang, Kyung-wha**  
**Former Minister of Foreign Affairs, Republic of Korea**

Kang, Kyung-wha is the Former Minister of Foreign Affairs of the Republic of Korea and served from June 2017 to February 2021. Most recently, she was Senior Advisor on Policy to the United Nations Secretary-General. She has held several high-level positions at the United Nations and the Ministry of Foreign Affairs of Korea. She has also served in the Office of the President, Office of the Speaker of the National Assembly, and has taught at Sejong University and Cleveland State University. Kang began her career as a Producer at the English Service Division of Radio Korea, Korean Broadcasting System. She has won the Special Award at the 11th Annual Korea Women Leaders Awards in 2013, the Service Merit Medal in 2006, and the Woman of the Year Award by the Korean National Council of Women in 2006. Kang received her B.A. from Yonsei University and both her M.A. and Ph.D. in Communication from the University of Massachusetts.
Jong-Woo Paik
Professor of College of Medicine, Kyung Hee University & Chairman of Korean Society for Traumatic Stress Studies (KSTSS)

Professor Jong-Woo Paik concentrates on depression and trauma-related disorder. He is also credited with taking the lead in establishing a support system for solving the suicide problem, and was awarded the Presidential Citation in 2018 for his contribution to suicide prevention. In recent years, Professor Paik has raised his concerns regarding the increasing suicide rate in the country, attributed to the COVID-19 pandemic. He conducted a nationwide study on mental health at the COVID-19 Pandemic, granted by government. Based on the results of the study, he suggested that although all age groups are difficult, support is needed, especially focusing on the difficulties of women, young people, and low-income families.

Jinkyoung Park
Head of Secretariat, Presidential Committee on Ageing Society and Population Policy (PCASPP)

Park, Jinkyoung serves as Head of Secretariat, Presidential Committee on Ageing Society and Population Policy (PCASPP) and is an expert in the field of women and gender equality. Park, Jinkyoung has served as the head of numerous associations in the field of women and gender equality. She also serves as the administrator of the Presidential Secretariat and is an invited professor at Ewha Womans University. She has recently been invited to the Ministerial Conference on Demographic Resolution hosted by the UNFPA where she explains that Korea’s low birth rate can be attributed to a combination of social, economic, and structural factors, changes in values of marriage and childbirth, and demographic factors. She is trying to draw social interest and cooperation in social policies for low birth rates and aging populations to improve the quality of life of all generations.

Ja-Young Kwon
Professor of Obstetrics and Gynecology (Maternal-Fetal Medicine), College of Medicine, Yonsei University

Professor Ja-Young Kwon, MD, is an active member of regional and international societies committed to enhancing maternal and fetal health. Dr Kwon holds a B.A. and Ph.D. in Obstetrics and Gynecology from the Yonsei University. She conducted her research in reproductive immunology as a visiting Assistant Professor at the Division of Reproductive Sciences, Department of Obstetrics, Gynecology and Reproductive Science, Reproductive Immunology Unit, Yale School of Medicine, USA. She was selected twice as ‘Best Professor of the Year’ by Yonsei University College of Medicine graduates and received awards from the Ministry of Korean National Institute of Health and Welfare in 2016 and 2021 for her dedication in making pregnancy and childbirth safe for every mother.

Chounsook Jung
21st National Assembly Member, Chairwoman of the National Women’s Committee of the Democratic Party of Korea

Jung Chounsook had spent 20 years working at NGO, Korea Women's Hot line, helping victims(survivors) of sexual and domestic violence. Additionally, she also coordinated the civil rights movement regarding prevention of domestic violence and protection of victims. Also, she was involved in policy advisory roles within committees and commissions at the National Human Rights Commission, Ministry of Justice, Seoul Metropolitan Government and the Supreme Court. In 2020, she was elected as the chair of National Assembly’s Gender Equality and Family Committee. She keeps her work to advocate in women’s rights, prevent crimes and support their victims. Also, She advocates for improving the quality of public health and welfare.
SPEAKER BIOGRAPHY

THURSDAY, FEBRUARY 10 at 13:30 – 14:30 KST

**DAY 1**

**PLENARY SESSION 1**

Equitable Vaccine Accessibility: Lessons Learned from COVID-19 Pandemic

**Moderator**

Professor AN Shinki, M.D., Ph.D., MDiv. is currently the director of Yonsei Institute for Global Health in Yonsei University Health System and Vice Chair of IGEE at Yonsei University.

At Yonsei Institute for Global Health, Professor An is in charge of collaborative professionals, contributing to the unification of the Korean peninsula and improvement of health inequalities.

**Shinki An**

Professor of Department of Medical Education, College of Medicine, Yonsei University & Director of Yonsei Institute for Global Health

**Mark Buttigieg**

Economic Diplomacy Counsellor of British Embassy in Korea

Mark Buttigieg joined the British Embassy in Seoul in July 2018 as Economic Diplomacy Counsellor. As well as economy, he also covers science and innovation, health, vaccines, energy and climate change, market access and business environment in the role. Mark began his career in the UK Civil Service in the Department for Environment Food and Rural Affairs, then worked in the Ministry of Justice and Cabinet Office before joining the Foreign and Commonwealth Office (FCO) in 2014.

Mark coordinated, implemented and negotiated EU policy across these departments with a particular focus on Justice and Home Affairs issues. At the Cabinet Office and in the FCO he also coordinated European Council policy working closely with No.10 and was then seconded to the Department for Exiting the EU as this was being set up. Upon returning to the FCO Mark worked on DPRK issues in London. He holds a degree in History from the University of Nottingham and is married with three children.

**David H. Do**

Director of Corporate Strategy & Corporate Affairs, AstraZeneca Korea

David H. Do is a Corporate Strategy & Affairs Director at AstraZeneca Korea where he oversees high level company strategy. He led negotiation and supply of COVID-19 Vaccine in Korea and contributed to the COVAX supply over 75 countries. As a result, he has received an award from MOHW (Ministry of Health and Welfare of South Korea) for his contribution. He also leads various policy work for the delivery of innovative medicine to patients and he is working on ESG initiatives.

Dr. Do has previously worked at the Boston Consulting Group (Seoul, Tokyo) where he advised conglomerates on corporate strategy in both healthcare and tech industries. He has dedicated himself to tackling big problems with transformative solutions. For example, he led a billion-dollar acquisition deal of a major US diagnostic company into the Tokyo market. In effect, it significantly increased the access to preventative / diagnostic tests of various cancers for Japanese citizens.

Dr. Do is keen on mentoring start-ups and university students. He is a mentor of TechStars where he advises international start-ups across the globe on fund raising and go-to-market strategy. Additionally, he provides career advice and lectures for promising science and management talents.

His PhD thesis was on the genetic impacts on Type 2 Diabetes (Supervisor: Patrik Rorsman at the University of Oxford) and he also worked on the relationship between natural killer cells and Multiple Sclerosis during his masters (Supervisor: Daniel Altmann at Imperial College London).

**Peter J. Hotez**

Professor of Department of Pediatrics and Molecular Virology & Microbiology, Baylor College of Medicine

Peter J. Hotez, M.D., Ph.D. is Dean of the National School of Tropical Medicine and Professor of Pediatrics and Molecular Virology & Microbiology at Baylor College of Medicine where he is also the Co-director of the Texas Children’s Center for Vaccine Development (CVD) and Texas Children’s Hospital Endowed Chair of Tropical Pediatrics. Dr. Hotez is an internationally-recognized physician-scientist in neglected tropical diseases and vaccine development.

As co-director of the Texas Children’s CVD, he leads a team and product development partnership for developing new vaccines for hookworm infection, schistosomiasis, leishmaniasis, Chagas disease, and SARS/MERS/SARS-2 coronavirus, diseases affecting hundreds of millions of children and adults worldwide, while championing access to vaccines globally and in the United States. In December 2021, Dr. Hotez led efforts at the Texas Children’s Center for Vaccine Development to develop a low-cost recombinant protein COVID vaccine for global health, resulting in emergency use authorization in India.
Jerome H. Kim, M.D., is an international expert on the development and evaluation of vaccines and is the Director General of the International Vaccine Institute (IVI), whose mission is to discover, develop and deliver safe, effective and affordable vaccines for Global Health. IVI’s oral cholera vaccine is used around the world to prevent this deadly diarrheal disease. IVI’s typhoid conjugate vaccine, tech-transferred to SK bioscience and PT Bio Farma, is in Phase III testing with regulatory approval expected in 2022. IVI is collaborating on vaccines against COVID-19 from different companies and in different stages of development, from the laboratory to post-approval. Prior to IVI, he was the Principal Deputy, US Military HIV Research Program and Chief, Laboratory of Molecular Virology and Pathogenesis at the Walter Reed Army Institute of Research, and Program Manager, HIV Vaccines, at the US Army Medical Research and Materiel Command. He led the Army’s RV144 Phase III HIV vaccine trial that showed efficacy in the prevention of HIV-1. Dr. Kim is an Adjunct Professor, Department of Medicine, Uniformed Services University and at the Graduate School of Public Health, Yonsei University. He has authored over 300 publications. He is a graduate of the University of Hawaii, with high honors in History and highest honors in Biology, and received his M.D. from the Yale University School of Medicine.

Joon Sup Yeom is a professor at Department of Infectious Disease at Yonsei University College of Medicine. Professor Yeom received his B.A., M.D., and Ph.D. in Medicine at Yonsei University and obtained Professional Diploma in Tropical Medicine and Hygiene (DTM&H) at London School of Hygiene and Tropical Medicine. His specialty is in Adult Infectious Diseases, Neglected Tropical Diseases (malaria and other parasitic diseases, vector-borne diseases) and Travel Medicine (Pre-travel & Post-travel).

Jayun Won is an undergraduate specializing in value consulting for start-ups, and Web 3.0. She is interested in promoting sustainable business models by providing strategy and branding consulting to social enterprises while experiencing all stages of the business development cycle for a start-up. Jayun pursues to be an all-rounder and bring forth change through sustainable business models. Her field of interest ranges from branding to backend coding. She has a strong background in project management and business development.

Soomin Hong is an undergraduate specializing in economics and fintech. She is interested in and experiencing all stages of the business development cycle for a start-up. She pursues all-rounder from social sciences to engineering, including education and coding. She has strong background in project management and business development.
Kunhee Ryu
Data Team Manager of Recoffery
& Undergraduate Student of Underwood International College, Yonsei University

Currently interested in the field of computer vision & AR & VR personally. Trying to become a professional data engineer. Educating at Yonsei university CTM, class of 19.
Mainly focus on the field of data science & data engineering. Data team does everything related to the data from seeking a new value which might give a whole new sight to manipulating data in different departments.
Data can be gathered and also it could be stuck to everywhere. Here, Recoffery, data from coffee ground is the most important so we try to understand about the data from the coffee ground. Data also helps labs to find new mixing ratios for our product. Optimization of different variables can lead us to a quicker way to reach our goal.
With the deep understanding of data-driven lab system, production system with data-pipeline, Recoffery is looking forward to becoming a pioneer of a digitalized company.

Dongjun Ko
Strategy Associate of Recoffery
& Undergraduate Student of Underwood International College, Yonsei University

Dongjun Ko is an undergraduate majoring in Creative Technology Management in Yonsei University. He is with interests and experience in Circular economy, Global Warming, Sustainable Energy, and ESG.
He was selected as a Korean representative at the Asian Students Venture Forum held in 2021 and insists on continuous interest and design in the environment.
He is working for a year and four months to design upcycled plastics plans and establish market strategies as Recoffery’s Strategy Associate. In June 2021, he drew investment in the green economy field of a preliminary start-up package organized by the Ministry of SMEs and Startups in Korea. He was selected as part of the government-controlled project and presented directions and business models related to the upcycling plan for wood waste in the military. In recognition of his exemplary activities during his military service, improved awareness of environmental issues, and elevated military status, he was awarded the Minister of National Defense award.

Yelim Hong
Research Associate of Recoffery
& Undergraduate Student of Underwood International College, Yonsei University

Yelim Hong is an undergraduate studying Energy and Environmental Science and Engineering. She is interested and experienced in the field of Climate Change, Environmental Engineering, Renewable Energy and ESG. She also majors in Economics for interdisciplinary research in the relation between economics and efficiency in renewable energy.
She is currently a Research and Development Associate in Recoffery, conducting research to develop new eco-friendly bioplastics to achieve sustainable development.
She has also conducted a project under Social Engagement Fund 2021, Yonsei University—‘Verifying the improvement of environmental awareness of youth with Greenhouse Game’, which claims a potential environmental awareness solution regarding SDG 12 (Responsible Consumption and Production) and SDG 13 (Climate Action).
**SPEAKER BIOGRAPHY**

**THURSDAY, FEBRUARY 10 at 15:00 – 16:00 KST**

**Jeesoo Park**  
Team Leader of SOLVERE & Undergraduate Student of Underwood International College, Yonsei University

Jeesoo Park is a sophomore at Yonsei Underwood International College, majoring in Information Interactive Design. Due to her interest in social issues, she is planning on double majoring in Political Science and International Relations in her junior years. She was a head of planning and designing department in Yonsei Street Cat Club, Yonyangsim for 3 semesters, and currently working as a team leader of the workstation for sustainable development, SOLVERE. While working in SOLVERE, she has been trying to increase awareness of SDG goals through various media based on her interest in social problems and design.

**Huiju Lee**  
Planning Team Leader of SOLVERE & Undergraduate Student of Underwood International College, Yonsei University

Huiju Lee is working as the planning team leader of the workstation SOLVERE and has been working on projects for a year. In the 2020 spring semester, SOLVERE published a magazine called SOLTAP about water shortage and environmental issues. She wrote the overall contents of Chapter 3 of the book includes an article introducing the challenge where you can feel the importance of water and recommendation of the environmental related documentary. In 2020-2, she became the leader of the planning team and worked on the SOLPLAT project. She posted a series of articles on water-related problems in cities, such as urban floods and water supply problems at the platform called ‘Brunch’. Team SOLVERE has been working on improving awareness of domestic water shortages and overseas water shortages, climate change, and trying to induce the people’s interest in the destruction of the marine ecosystem caused by water pollution.

**Boyun Choi**  
Member of SOLVERE & Undergraduate Student of Underwood International College, Yonsei University

Boyun Choi is a member of SOLVERE and an undergraduate student of Underwood International College, Yonsei University. She is now in Economics major of her own division and mainly interested in an international society and economics, human rights, culture and sustainable development. She has been a youth supporter of Global Leaders Forum 2021.
Katrin Harvey has over a decade’s experience in sustainability, climate change, clean energy, and organizational management. Having lead business development, strategic growth, and communications at REEEP, she combines her academic background in language studies and international development to enhance the impact of non-profit organizations. With her track record of project management in Africa and Asia, focussing on capacity building, market development, and public-private dialogue she has been successful in creating lasting results in empowering local communities. Her focus has been on sustainability in agri-food value chains and in managing international knowledge exchange amongst experts in energy efficiency, energy regulation, and international law.

Julia Zimmerman
Program Officer of Ban Ki-moon Centre for Global Citizens (BKMC)

Julia is an engaged professional, change-maker and passionate advocate for sustainability, human rights, and gender equality with 3+ years of experience managing programmes for international NGOs and partnering with diverse local, regional, and international stakeholders. Prior to her role as a Programme Officer at the Ban Ki-moon Centre, Julia worked as a teacher, journalist and with the international NGO CARE on a project to end child marriage occurring in Nepal and Bangladesh. As a journalist, Julia has had articles published on In-Depth News, SDGs for All, and East West Institute on topics related to gender equality, empowerment, and security. She is a dedicated advocate and member of the V-Day movement to end gender-based violence globally and seeks to use her career and voice to uplift and empower others. An American national, she moved to Vienna shortly after receiving her bachelor’s degree in California and has been there ever since. She earned her Master’s degree (cum laude) in International Relations from Webster Vienna Private University in 2018.

Dr. Heinz Fischer, 11th President of the Republic of Austria (2004 – 2016), has had an extensive career as a senior representative and policymaker of the Republic of Austria. As Federal Minister of Science and Research and as speaker of the Austrian National Assembly for more than 12 years, Dr. Fischer was involved extensively in supporting and advancing the country’s scientific, social, and cultural development. He was re-elected in 2010 and retired in July 2016, after more than 40 years in public office and two terms as Federal President. After completing two terms as head of state Dr. Fischer was teaching as a professor for political science at the University of Innsbruck and was proclaimed Chairman of the Council for the Commemorative Year 2018 by the Federal Government of Austria. Furthermore, in June 2016 Heinz Fischer was named president of the Association of Austrian Adult Education Centers. Since September 2016 he occupies the position as president of the Austrian Society for Chinese Studies and as of January 2017, he is president of the Board of the Institute for Human Sciences.
In April 2019, Mr. Ban was elected as the Chairman of the Presidential National Council on Climate and Air Quality (NCCA). In April 2018, Mr. Ban was elected as the Chairman of the Boao Forum for Asia. In January 2018, Mr. Ban, along with former President of Austria Mr. Heinz Fischer, were inducted as Co-Chairs of the Ban Ki-moon Centre for Global Citizens in Vienna, Austria. Mr. Ban Ki-moon was also elected as Chairman of the IOC Ethics Committee in September 2017. Currently, he is the Distinguished Chair Professor and Honorary Chairman at the Institute of Global Engagement & Empowerment at Yonsei University in Seoul, Korea. In February 2018, he was elected and has been serving as the President of the Assembly & Chair of the Council of Global Green Growth Institute (GGGI).

Prior to these appointments, Mr. Ban served two consecutive terms as the Secretary General of the United Nations (2007-2016). Throughout his tenure at the UN, Mr. Ban strove to be a bridge builder, to give voice to the world’s poorest and the most vulnerable people, and to make the Organization more transparent and effective. He successfully pressed for action to combat climate change - an effort that culminated in the adoption and rapid entry into the landmark Paris Agreement in 2016. Mr. Ban worked closely with member states of the UN to shape the 2030 Agenda for Sustainable Development and to establish UN Women, which has been advancing the Organization’s work for gender equality and women’s empowerment. Mr. Ban also launched major efforts to strengthen UN peace operations, to protect human rights, to improve humanitarian response, and to prevent violent extremism and to revitalize the disarmament agenda.

At the time of his appointment at the UN, Mr. Ban was the Minister of Foreign Affairs and Trade of the Republic of Korea. His 37 years with the Ministry included postings in New Delhi, Washington D.C., and Vienna, and responsibilities for a variety of portfolios, including Foreign Policy Adviser to the President, Chief National Security Adviser to the President, Vice Minister, Deputy Minister for Policy Planning and Director-General for American Affairs. Mr. Ban has also been actively involved in issues relating to inter-Korean relations by serving as Chairman of the Preparatory Commission for the Comprehensive Nuclear Test Ban Treaty Organization. Mr. Ban received a bachelor’s degree in international relations from Seoul National University in 1970. He earned a master’s degree in public administration from the John F. Kennedy School of Government at Harvard University in 1985.
Since 1st January 2020, Vibeke Jensen is the incumbent Director of the Division for Peace and Sustainable Development within the Education Sector at UNESCO Headquarters. The Division covers, amongst others, education for sustainable development, global citizenship education, prevention of violent extremism, sexuality and HIV education, school violence and bullying, school health, and the UNESCO Associated Schools network with 11000 schools around the world. She joined UNESCO in 1989 and has held various positions in the Organization, both at Headquarters and in the field. Since November 2014, she has been Director of the UNESCO Office in Islamabad and UNESCO Representative to Pakistan. Her previous positions include Head of the UNESCO Office in Hanoi from 2007 to 2009, Director of the UNESCO Office in Dar-es-Salaam (Comoros, Madagascar, Mauritius, Seychelles, United Republic of Tanzania) from 2009 to 2013 and UNESCO Director and Head, Secretariat of the Secretary-General’s Global Education First Initiative (GEFI), United Nations, New York from 2013 to 2014.

Sam Loni is a Program Director at the UN Sustainable Development Solutions Network (SDSN) - a research and policy organisation, working under the auspices of the United Nations Secretary-General. He is also the founder and director of Global Schools, a program that combines research and training to promote education for sustainable development around the world. Sam has an extensive background in sustainable development and works at the intersection of public policy, economics, and environmental change. He has also been named as a young peace builder by the Nobel Peace Prize Forum, by Forbes Magazine as one of Asia’s top under-30 social entrepreneurs, and by the NAEEA as a young environmental leader. Sam serves as an advisor to several initiatives and programmes, including the Lancet COVID-19 Commission, Mission 4.7, Global Citizen, UN Strategy Hub, and UNLEASH Innovation Labs.

Ramu Damodaran has worked for, and at, the United Nations for more than thirty years, most recently as Chief of Partnerships and Public Engagement in the United Nations Department of Global Communications Outreach Division. His responsibilities focused particularly on outreach to, and partnerships with, global academic and research institutions, civil society and the creative community, the flagship publications of the Organization, UN Chronicle and The Yearbook of the United Nations, as well as the United Nations Dag Hammarskjöld Library. In 2008 he was asked by the United Nations Secretary-General to design the United Nations Academic Impact initiative, which was launched in 2010 and which he led until May 2021, when he concluded his United Nations career. He also served, from 2011 to 2021, as Secretary of the United Nations General Assembly’s Committee on Information and the Department’s focal point for legislative relationships with Member States. His initiatives in donor relations include the “Many Languages, One World” multilingual essay contests with ELS Education Services, a global competition for projects on diversity with United Colours of Benetton and financial contributions to the Academic Impact.

In his initial years at the United Nations, he was the Indian delegate to the Fourth Committee and the Special Committee on Decolonization, as well as Chair of the drafting committee of the United Nations Council for Namibia as that territory, administered by the United Nations, moved to sovereignty and independence. On joining the United Nations Secretariat, he was assigned to the Department of Special Political Questions, with particular responsibilities for peacemaking in Namibia and Western Sahara, and served as Secretary of the Secretary-General’s mission to Kuwait in 1991 in the wake of Iraq’s occupation of, and subsequent withdrawal from, that country. He joined the Department of Peacekeeping in 1994 as focal point and spokesman to Member States and was assigned to the Executive Office of the Secretary-General the following year. On joining the Department of Global Communications in 1996, he was tasked with developing the engagement of the United Nations with the global academic community which he initiated through a transformation of the flagship publication UN Chronicle into a journal that explored themes of contemporary importance to the Organization, particularly the General Assembly and Security Council, through articles from a worldwide pool of scholars that were authoritative, informed and engaging.
Speaker Biography

Thursday, February 10 at 16:00 – 17:30 KST

Ramu Damodaran is a member of the Leadership Council of the Sustainable Development Solutions Network and a senior adviser to the University for Peace. In addition to regular speaking engagements at universities and civil society organizations globally, he has taught and conducted courses on the United Nations at New York University, at Kyung-Hee University in the Republic of Korea and at Macquarie University in Australia. Prior to his United Nations career, he was a member of the Indian Foreign Service where he served as Executive Assistant to the Prime Minister of India from 1991 to 1994. He has also served in the Indian embassy in Moscow and in assignments in New Delhi with a range of governmental ministries including External Affairs and Defence, as well as Home Affairs, Human Resource Development and Planning. He holds a Master’s degree in History from the University of Delhi and has worked extensively in Indian mass media - television, radio and print publications-and theatre, including as a news anchor, disc jockey and stage actor. His radio feature “Echoes of a Generation” was awarded the Asia-Pacific Broadcasting Union Prize. He was also President of the United Nations Staff Recreation Council, which brings together cultural clubs created by staff members, from 2003 to 2021.

Gillian Ndlovu
Global Citizen Scholar 2021, Ban Ki-moon Centre for Global Citizens (BKMC)

Gillian is from the Matabeleland North province of Zimbabwe. She has always been determined to forge a career that would empower her to make a difference in her community and beyond. She holds a bachelor’s double degree in Business Management and Information Technology (hons) from the Catholic University of Zimbabwe and recently graduated from Lincoln university (NZ) with a Master of Management in Agribusiness (Distinction) in which she completed through the prestigious New Zealand Development Scholarships Programme. She has worked in the education and agricultural sectors and has also volunteered in community development projects. Her academic and professional journey opened her mind to the endless possibilities, opportunities as well as solutions that education, agriculture and economics offer for strategically solving the greatest problems the world is facing today. It groomed her into a faithful steward of international development. Now, more than ever, she is prepared to work and soar high towards the achievement of sustainable futures/livelihoods for all.

Gillian was selected as a Ban Ki-moon Centre Global Citizen Scholar in 2021 and implemented an SDG Micro-Project called BLISS (Bolstering Locally grown towards an Innovative and Sustainable Society) in Bindura, Zimbabwe to support sustainable diets, environment, and agriculture “in communities, by communities and for communities.”

Rosario Diaz Garavito
Global Citizen Fellow 2021, Ban Ki-moon Centre for Global Citizens (BKMC)

Rosario is a SDGs activist from Peru. She is the Founder and Executive Director of the Millennials Movement. Rosario serves as Elected Focal Point for the Children, Adolescent and Youth Group of the Latin American and the Caribbean Region Civil Society Participation Mechanism (MesCLAC) - regional representation for the Major Group of Children at the formal review process of the 2030 Agenda for Sustainable Development at the United Nations. On 2019, she was awarded as Obama Scholar, graduating from the Master’s Degree in International Development and Policy at the Harris School of Public Policy, University of Chicago.

Rosario is a specialist in SDGs, sustainable development, and youth policies. She has experience in civil society and grassroots organizations and served to different international organizations, including her participation as UNV for the Poverty and Environment Initiative UNDP and as consultant for the UNFPA LACRO Regional Office. Her work is focus on supporting youth, women and grassroots organizations to be part and bring the voices and actions from the territories to global and regional decision-making spaces and efforts to achieve a more inclusive, peaceful and sustainable world, supporting the advancement of the SDGs.
Rosario is a mobilizer, during her participation as UN Youth Advocate for the UN My World 2015 survey between 2014 – 2015, she led a process that mobilized 38,000 Peruvians through the survey and workshops to bring their voices to the United Nations for the definition of the 2030. On 2019 she led the youth engagement process for the 2030 Agenda LAC Youth Forum, mobilizing more than 3,000 youth from 21 countries in region for the review process of the 2030 Agenda at the UN Economic Commission for the LAC region – UN ECLAC. Currently, within The Millennials Movement she leads initiatives and projects that in 2021 reached around 150,000 people in 19+ countries in the Latin American and Caribbean region.

Rosario has represented Latin American and the Caribbean youth in different intergovernmental decision-making spaces such as the United Nations ECOSOC Youth Forum 2019 – 2021, where she co-leads the Latin American Youth Participation process within UN ECLAC and on 2021 was part of the UN Youth 2030 Strategy, Score Card Validation team, contributing with the efforts of the UN Youth Envoys Office; on 2018 she represented youth of the Americas region at the Heads of States Plenary session of the VIII Americas Summit, bringing the youth recommendations.

Rosario has been invited to share her experiences on different spaces such as the UN SDG Summit Action Zone, the UN SDG Festival of Ideas 2017, the UN youth Skills Day 2016 at the UNHQ, UN Women Side event and others. Rosario is member and contributes with relevant spaces, she is a fellow for the LAC Women Empower Program 2022-2023 of the Ban Ki Moon Center; Women Champion 2015 - 2016 for UN Women, Youth Power Panelist 2020 - 2021 for the #YouthPower Initiative of The Global Goals Campaign; “Empower Women” Global Movement for Women Economic Empowerment; fellow of the Young Leaders of the Americas Initiative 2016; UNLEASH Talent 2017; Member of the Peruvian Delegation for the United Nations Ubuntu Leaders Program 2021 and Peruvian Youth Delegate for the United Nations High Level Political Forum 2017. Rosario’s work it’s been recognized by the Vice Presidency of Peru, the Regional Coordinator of the UN System in Peru, The United Nations Millennium Campaign, AIESEC International with the Leader for Peace Award.

Ms. Shireen Shehzad Bhamani is a nurse, epidemiologist and biostatistician. Currently, she is completing her Ph.D. in Health Sciences at Ghent University, Belgium. She completed her MSc in Epidemiology & Biostatistics in 2013 and a BSc in Nursing in 2004 from Aga Khan University Pakistan. Presently, she is also working as an Assistant Professor at Aga Khan University School of Nursing and Midwifery, Pakistan.

Shireen has been immensely involved in education, practice, and research. Her area of expertise in all these domains highlights Public Health Nursing with a special emphasis on women’s mental health and its intergenerational effects. She has been involved in multiple research projects on improving mental illness and promoting resilience among adolescents and women. She has secured the Queen Elizabeth Scholarship and Aga Khan University Research council funds for her work on resilience, depression and anxiety among pregnant women in Pakistan.

Being a daughter of a women-oriented family and dealing with the challenges of being a girl or woman residing in an urban city of Pakistan, she always had a passion to become a change agent for the lives of women and girls. Working for those who are part of her country’s unfortunate and underprivileged population has always been a priority for her. She has always been keen to initiate networking with leaders of education, community practice, and policymakers to work together to achieve the “Health for ALL.”

Shireen was selected as a Ban Ki-moon Centre Global Citizen Mentee 2021 and implemented an SDG Micro-Project in her community in Pakistan to decrease depression and increase the resilience of elderly persons in nursing homes.
JeongGil Ko is an associate professor in the School of Integrated Technology, College of Engineering at Yonsei University. He received his B.Eng. degree in computer science and engineering from Korea University in 2007 and received his Ph.D. degree in Computer Science from the Johns Hopkins University in 2012. In 2010, he was at the Department of Computer Science, Stanford University as a visiting researcher. From June 2012 to August 2015, JeongGil Ko was a senior researcher at the Electronics and Telecommunications Research Institute (ETRI) and he was an assistant professor at the Department of Software and Computer Engineering at Ajou University from September 2015 to August 2019. He is a recipient of the Abel Wolman Fellowship awarded by the Whiting School of Engineering at the Johns Hopkins University in 2007 and a senior member of the IEEE since 2017. His research interests are in the general area of developing embedded and mobile computing systems with ambient intelligence.

JeongGil Ko
Associate Professor of School of Integrated Technology, College of Engineering, Yonsei University

Jie Liu is a Chair Professor at Harbin Institute of Technology Shenzhen (HIT Shenzhen), China and the Dean of its AI Research Institute. Founded in 1920, Harbin Institute of Technology (HIT) is a multi-disciplinary university with science, engineering and research as its core. It has campuses at Harbin, Shenzhen, and Weihai in China. The AI Research Institute of HIT was established in 2018 across disciplines and campuses, focusing on fundamental and applied research of AI-related fields.

Before joining HIT, Jie Liu spent 18 years at Xerox PARC and Microsoft. He was a Principal Research Manager at Microsoft Research and a partner of the company. His research interests are sensor networks, AI for IoT, and energy efficient computing. He is the founding chair of ACM SIGBED China, the steering Committee Chair for Cyber-Physical Systems and Internet of Things Week (CPS-IoT Week), and steering Committee Chair for ACM/IEEE International Conference on Information Processing in Sensor Networks (IPSN). He received IEEE TCCPS Distinguished Leadership Award, Leon Chua Award, Microsoft Gold Star Award, among others. He is an IEEE Fellow and an ACM Distinguished Scientist.

Jie Liu
Dean of AI Research Institute, Harbin Institute of Technology (Shenzhen)

Cecilia Mascolo is the mother of a teenage daughter but also a Full Professor of Mobile Systems in the Department of Computer Science and Technology, University of Cambridge, UK. She is co-director of the Centre for Mobile, Wearable System and Augmented Intelligence and was Deputy Head of Department for Research (19-21). She is also a Fellow of Jesus College Cambridge and the recipient of an ERC Advanced Research Grant. Prior to joining Cambridge in 2008, she was a faculty member in the Department of Computer Science at University College London. She holds a Ph.D. from the University of Bologna. Her research interests are in mobile systems and data for health, human mobility modeling, sensor systems and networking, and mobile data analysis. She has published in a number of top-tier conferences and journals in the area and her investigator experience spans projects funded by Research Councils and industry. She has received numerous best paper awards and in 2016 was listed in “10 Women in Networking / Communications You Should Know”. She has served as steering, organizing and program committee member of mobile, sensor systems, networking, data science conferences, and workshops. She has delivered a number of keynote talks at conferences and workshops in the area of mobility, data science, pervasive computing and systems. More details at www.cl.cam.ac.uk/users/cm542

Cecilia Mascolo
Professor of Mobile Systems, University of Cambridge
SPEAKER BIOGRAPHY
THURSDAY, FEBRUARY 10 at 17:30 – 18:30 KST

Sozo INOUE is a full professor in the National Kyushu Institute of Technology, Japan, and the Chief Technical Officer of AUTOCARE LLC. His research interests include human activity recognition with smart phones, and healthcare application of web/pervasive/ubiquitous systems. Currently he is working on verification studies in real field applications, and collecting and providing a large-scale open dataset for activity recognition, such as a mobile accelerator dataset with about 35,000 activity data from more than 200 subjects, nurses’ sensor data combined with 100 patients’ sensor data and medical records, and 34 households’ light sensor data set for 4 months combined with smart meter data.

Inoue has a Ph.D. of Engineering from Kyushu University in 2003. After completion of his degree, he was appointed as an assistant professor in the Faculty of Information Science and Electrical Engineering at the Kyushu University, Japan. He then moved to the Research Department at the Kyushu University Library in 2006. Since 2009, he has been appointed as an associate professor in the Faculty of Engineering at Kyushu Institute of Technology, Japan, and moved to Graduate School of Life Science and Systems Engineering at Kyushu Institute of Technology in 2018, and appointed as a full professor from 2020. Meanwhile, he was a guest professor in Kyushu University, a visiting professor at Karlsruhe Institute of Technology, Germany, in 2014, a special researcher at Institute of Systems, Information Technologies and Nanotechnologies (ISIT) during 2015-2016, and a guest professor at University of Los Andes in Colombia in 2019. He was a technical advisor of Team AIBOD Co. Ltd during 2017-2019, and a guest researcher at RIKEN Center for Advanced Intelligence Project (AIP) during 2017-2019. He is a director and a senior member of the Information Processing Society of Japan (IPSJ), a member of the IEEE Computer Society, the ACM, the Institute of Electronics, Information and Communication Engineers (IEICE), the Japan Society for Fuzzy Theory and Intelligent Informatics, the Japan Association for Medical Informatics (JAMI), and the Database Society of Japan (DBSI).

Moon Choi is a tenured Associate Professor in the Graduate School of Science and Technology Policy at Korea Advanced Institute of Science and Technology (KAIST) and has founded and run a research group called Aging and Technology Policy Lab (http://aging.kaist.ac.kr/). Her research group has focused on examining the mechanisms of social problems related to population aging and new technologies, providing policy analysis and recommendations on the issues.

Prof. Choi has an Interdisciplinary training and educational background. She has earned her bachelor’s degree in Biochemistry from Yonsei University and master’s and doctoral degrees in Social Welfare with a concentration on Gerontology from Seoul National University and Case Western Reserve University. Before joining KAIST, she was an Assistant Professor at the University of Kentucky College of Social Work and also interned at the United Nations Secretariat Department of Economic and Social Affairs in New York City. She has been appointed as a consultant for the United Nations APCICT/ESCAP and currently serves as an associate editor of the Journal of Transport & Health and Frontiers in Public Health. In her spare time, she enjoys drawing and painting.
Im Il is a Professor of Information Systems in the School of Business at Yonsei University, and he is a member of The Korean Academy of Science and Technology (KAST). He is also the Head of Brain Korea 21. He received his MBA and Bachelor’s degree at Seoul National University and received his Ph.D. degree at the University of Southern California. His research interests mainly include Personalization Technologies, Recommenders Systems, Social Network Service (SNS) and its impacts, and Technology acceptance and use. Before he joined Yonsei University in 2005, he worked as an Assistant Professor at the New Jersey Institute of Technology during 2000-2004. Meanwhile, he also worked as an Assistant Professor at the Graduate School of Management at Rutgers University during 2002-2004. He previously worked as the Associate Editor of Productivity Review and The Korean Small Business Review. He currently is the President of Korea Intelligent Information System Society and an Editorial Board Member of the Korean Association of Small Business Studies. He has been working as the Vice President of the Korean Academy of Motor Industry from January 2014 until now. He has received an Outstanding Teaching Award from Yonsei University.

Eun Jung Kim is the vice president of SK SUPEX Council’s Social Value Committee. She joined Social Value Committee in January 2020 and led strategic planning for fostering talent in Social Enterprise Community and promoted social value via a platform called SOVAC, which is the largest private sector-led social value festival in Korea. Currently, she is focusing on creating social value and boosting ESG management within SK Group. She is as at the center promoting high-quality content to improve social awareness not only internally but externally and expand SV community through SOVAC. Also, she is extending her presence through conducting thoughtful care programs for the socially underprivileged, leveraging SK’s unique ‘safety net’ concept.

Mr. Park, Sung Gyu is a vice president of Hyundai Motor Group. He leads the Economy & Policy research team of HMG Business Intelligence Institute, which focuses on geopolitical issues, Macroeconomic trends and ESG issues. In 2015, he played a role as an advisor for greencar strategy forum hosted by Ministry of Trade, Industry and Energy. In 2016, he joined the HMC’s FCEV Taskforce, where he actively worked to rollout the NEXO and to improve the public awareness on Hydrogen.

Jeonghwa Oh is the Senior Vice President of the Sustainability Management Division at AmorePacific. She has specialized in environmental management and sustainability activities at AmorePacific since 1996. At AmorePacific, she has designed and implemented sustainability management goals for 2030. Ms. Oh recently led launching of the ‘Refill Station’ at Amore Store Gwanggyo, which is the first attempt in the history of Korea’s cosmetic industry. With the debut of Refill Station, AmorePacific officially began to join RE100. She has also participated in the committee of the Creating Shared Value (CSV) forum initiated by the Ministry of Commerce Industry and Energy. In addition, Ms. Oh is actively engaged in the Packaging Waste Reduction Guideline Development Project led by the Ministry of Environment.
Dongyoub Shin is a Professor of Management in the School of Business at Yonsei University. He currently is also the President of the Korean Academy of Management and the Chair of the Seoul Spring International Chamber Music Festival. He received his Ph.D. degree from Yale University and received both Master’s and Bachelor’s degrees from Yonsei University. Prior to joining Yonsei University, he was the Research Fellow at INSEAD from 1996 until 1997, and he also was the Research Fellow of Yale Program on Non-Profit Organization during 1995 - 1996. His research interests include Institutional Change, Creativity and Innovation, Paradigm Shift in Organization Management, Social Network, Nonprofit Organization, Art and Management, and Social Movement. He previously worked as an Editor at the Korean Academy of Management Journal, during 2010 – 2012. Then he served as a President at the Korean Academy of Management, during 2015 - 2016. He has received an Outstanding Teaching Award at Yonsei University and a Thompson Outstanding Paper Award from American Sociological Association.

Professor Hyun-Han Shin is a professor of finance in Yonsei School of Business. He has also served as an Outside Director or Committee member of various Korean Conglomerates and Government Organizations. He began his teaching career at University of Oregon as a visiting assistant professor in 1995. He went to California Polytechnic State University in 1996 as an associate professor, and moved to State University of New York at Buffalo in 1998. He joined Yonsei University in 2002 as an assistant professor of finance. He is tenured in 2005 and became a full professor in 2010. He also served as an Associate Dean in YSB between 2010 and 2012, Vice President for Student Affairs and Services between 2020 and 2021, and serving as Finance Department Chair now. In 2012, he was recognized as the YSB Outstanding Teacher of the Year for his Executive MBA course. He continually challenges his students and sets high expectations for them. His current research includes corporate governance and innovation, performance of suppliers, family firms, and CEO turnover. He has earned many outstanding research awards from various academic associations.

Dr. Jooyoung Kwak is a Professor of International Business at the School of Business, Yonsei University. She is currently the Director at the Center for Sustainable Development. She has been a member at Presidential Committee for Policy and Planning, has advised Minister of Trade, and has evaluated the performance of Ministry of Industry, Trade and Energy. In addition, she is a member of dispute settlement committee of Korea Trade Insurance Corporation, and advises the ESG-related issues for LG Corporation. Also, she is a regular columnist for Korea Economic Daily. Educated at Seoul National University (BA, Master of Economics) and Massachusetts Institute of Technology (Ph.D.), she works both as an economist and a business scholar.
SPEAKER BIOGRAPHY

THURSDAY, FEBRUARY 10 at 20:15 – 21:30 KST

DAY

FEATURED & SCIENTIFIC SESSION 6
Sustainable Partnership for International Organizations

Moderator

Yeonho Lee
Professor of Political Science &
Dean of Social Science College,
Yonsei University

Yeonho Lee is a Professor of Political Science in the Department of Political Science and International Studies, Dean of Social Science College, and the Director of EU Jean Monnet Centre of Excellence, Yonsei University. He received his BA in Political Science at Yonsei University, Korea. He read political science at the University of Cambridge, UK, with the support of the Chevening Scholarship, and obtained MPhil and PhD. He had been an ESRC Fellow at the University of Warwick, UK, until he joined in Yonsei in 1998. His research and teaching interests include international development cooperation and EU, development theories and the Korean political economy. He is the author The State, Society and Big Business in South Korea, Routledge and Theories of Development, Yonsei University Press, Unequal Development and Democracy in South Korea, Pakyongsa. He has also published several articles in academic journals including the Pacific Review, Asian Survey and Korean Political Science Review.

Mahmoud Mohieldin
Executive Director of International Monetary Fund (IMF)

Dr. Mohieldin, is an economist with more than 30 years of experience in international finance and development. He is an Executive Director at the International Monetary Fund. He has been United Nations Special Envoy on Financing the 2030 Development Agenda since February 2020. He was the former Minister of Investment of Egypt from 2004-2010, and most recently, served as the World Bank Group Senior Vice President for the 2030 Development Agenda, United Nations Relations and Partnerships. His roles at the World Bank also included Managing Director, responsible for Human Development, Sustainable Development, Poverty Reduction and Economic Management, Finance and Private Sector Development, and the World Bank Institute; World Bank President’s Special Envoy on the Millennium Development Goals (MDGs), the Post-2015 Development Agenda (later, the Sustainable Development Goals (SDGs), and Financing for Development; and Corporate Secretary and Executive Secretary to the Development Committee of the World Bank Group’s Board of Governors. Mr. Mohieldin also served on several Boards of Directors in the Central Bank of Egypt and the corporate sector. He was a member of the Commission on Growth and Development and selected a Young Global Leader of the World Economic Forum in 2005. His professional experience extends into the academic arena as a Professor of Economics and Finance at the Faculty of Economics and Political Science, Cairo University and as a Visiting Professor at several renowned Universities in Egypt, Korea, the UAE, the UK and the USA. He is a member of the International Advisory Board of Durham University Business School. He also holds leading positions in national, regional and international research centers and economic associations. Mr. Mohieldin holds a Ph.D. in Economics from the University of Warwick, United Kingdom; a Master’s in Economics and Social Policy Analysis from the University of York, United Kingdom; a Diploma of Development Economics from the University of Warwick; and a B.Sc. in Economics from Cairo University. He also participated in high-level certification programmes at Wharton Business School of the University of Pennsylvania and Georgetown University. In 2018, the American University in Cairo conferred upon him the honorary degree of doctor of Humane Letters “in recognition of renowned attainments and achievements”. He has authored numerous publications and articles in leading journals in the fields of economics, finance and development in English and Arabic.
Thomas Abell is the Chief of ADB's Digital Technology for Development Unit, which promotes the effective use of digital technology across ADB programs to improve development impact. His team works with ADB member countries in supporting the transition to the digital economy and provides assistance across many areas, including eGovernment, Tech startup ecosystems, technology policy, and tech industry partnerships. Thomas has over 30 years of professional experience in digital technology, including technology policy and strategy, software development, and system architecture. During his 10+ years of experience in international development, he has worked extensively across Asia, Africa and Latin America, working with governments, development organizations, NGOs and corporations. He has authored many publications on technology innovation in development, focused mainly on education, financial inclusion and agriculture. Thomas has master’s degrees in engineering and management and a bachelor’s in engineering from MIT.

Dr. Julitta Onabanjo is the Director of the Technical Division of UNFPA, currently based at the headquarters in New York city, USA. UNFPA is the United Nations Sexual and Reproductive Health agency whose mission is to deliver a world where every pregnancy is wanted, every childbirth is safe and every young person’s potential is fulfilled. Dr. Onabanjo provides strategic oversight, support and technical expertise to all the Country Offices and partners, who work on the ground to improve people’s lives by equipping them with policy advice, training and support. Furthermore, the Technical Division Office focuses its efforts on impacting the lives of women and young people by empowering them and placing gender equality and human rights at the heart of this. Dr. Onabanjo is a public health specialist with wide ranging field and executive experience having worked in Nigeria, Eswatini, Kenya, Tanzania, South Africa and the UNFPA Headquarters. She holds a Bachelor’s Degree in biology from the University of London and a Medical Doctor degree from the University of Zambia, in addition to a Master’s Degree in Public Health from the London School of Hygiene and Tropical Medicine.

Amb. Hyoeun Jenny Kim is Ambassador and Deputy Minister for Climate Change in the Ministry of Foreign Affairs of the Republic of Korea since July 2021. She is also chief negotiator of UNFCCC Paris agreement, representing her country. Before taking the role, she was Deputy Director-General of the Global Green Growth Institute (GGGI). She was responsible for managing GGGI’s in-country operations in more than 35 countries, supporting low carbon economic growth in line with Paris Climate Agreement and UNSDGs. From 2016 to 2018, she was the Ambassador of the Republic of Korea to Senegal and five neighboring countries. She contributed to build a strategic relationship on development cooperation between Korea and West Africa. During 2013 to 2016, as the Director for Strategy, Policy, and Communication at the GGGI, she led the development of GGGI Strategic Plan 2015-2020, governance structural reform, and outreach. As a career diplomat in Korean Ministry of Foreign Affairs, she served as Director for Climate Change and Environment Affairs and Director for World Trade Organization (WTO). She served as the Vice-Chair of Trade and Environment Joint Committee of the OECD and the Chair of Budget and Management Committee of the APEC. She earned her Bachelor’s in political science and diplomacy from Yonsei University in Seoul and the Master’s degree from the Jackson School of International Studies at the University of Washington in Seattle. She is married with one son. She wrote A Diplomat Must Be a Multiplayer in 2008, describing life of diplomats. Her second book, titled Audacious Challenge to International Organizations, was published in 2013. She also supervised publishing However Long the Night in Korean translation in 2019.
Heejin Lee is Professor at the Graduate School of International Studies, Yonsei University. He has a multidisciplinary background: BA in management and MA in sociology at Seoul National University, and Ph.D. in information systems at London School of Economics. Before joining Yonsei, he worked for the University of Melbourne, Australia and Brunel University, UK.

The areas of interest and expertise include standards and standardization, ICT4D (ICT for Development)/Digital Development, and Australian studies. Currently, he is leading two research centers: ‘Center for Converging Industries and Standardization’ and ‘Centre for Australian Studies’ at Yonsei. Recent publications include “The changing patterns of China’s international standardization in ICT under techno-nationalism: A reflection through 5G standardization” (International Journal of Information Management, 2020).

Dr. Jooyoung Kwak is a Professor of International Business at the School of Business, Yonsei University. She is currently the Director at the Center for Sustainable Development. She has been a member at Presidential Committee for Policy and Planning, has advised Minister of Trade, and has evaluated the performance of Ministry of Industry, Trade and Energy. In addition, she is a member of dispute settlement committee of Korea Trade Insurance Corporation, and advises the ESG-related issues for LG Corporation. Also, she is a regular columnist for Korea Economic Daily. Educated at Seoul National University (BA, Master of Economics) and Massachusetts Institute of Technology (Ph.D.), she works both as an economist and a business scholar.

Keeheon Lee is an Associate Professor and Chair of Creative Technology Management at Yonsei University. His recent research has explored the economic and carbon emission implications of improving the efficiency of deep learning, how to design ethics frameworks for AI reference, and applications of AI to improve social sustainability in product design. He serves as a committee member of Design Factory Korea. Dr. Lee received both his MSc and Ph.D. in Information and Industrial Engineering from Yonsei University.

Jung-Woo Ha is the Head of NAVER AI LAB and is directing AI research of NAVER. He received his BS and Ph.D. degrees from Seoul National University. His research interests include all machine learning and deep learning-based AI technologies and applications such as computer vision, natural language processing, speech recognition, recommendation, and so on. Recently, he works as the project owner of a healthcare AI project for NAVER Internal Hospital. For the past four years, he has served as a reviewer of top AI conferences including NeurIPS, ICML, ICLR, CVPR, ICCV, ECCV, ACL, EMNLP, SIGGRAPH, NAACL, AAAI, etc.
DAY 2

FEATURED & SCIENTIFIC SESSION 8
Global Health and Partnerships to Further Our Common Future: Where We Are and Where We Should Be
The Importance of Global Health and Institutional Collaboration with Perspectives From South Korea and The United States (SDGs 3 and 17)

Francis Yang
Master’s Program in Public Health, Yale School of Public Health

Dr. Khoshnood is an Associate Professor and Director of Undergraduate Studies at the Yale School of Public Health and executive committee member at Yale Council on Middle East Studies. He is co-founder of Yale Violence and Health Study Group and a faculty member of the Program on Conflict, Resiliency and Health at the Yale MacMillan Center. Dr. Khoshnood is trained as an infectious disease epidemiologist and has more than three decades of domestic and international experience in HIV prevention research among people who use drugs and other at-risk populations. Dr. Khoshnood’s research interests include: 1) epidemiology and prevention of HIV/AIDS, 2) research ethics and 3) humanitarian health. His projects are primarily in China, Lebanon and Bhutan. Dr. Khoshnood teaches a new course on health in humanitarian crises.

Francis is currently an MPH candidate at the Yale School of Public Health, specializing in Social Behavioral Sciences and Global Health. Francis first came to Yonsei University’s Institute of East and West Studies as a visiting researcher, where he worked on studies examining global health ethics and COVID-19 policy compliance. Additionally, Francis worked closely with IEWS to organize a collaborative panel between Yale and Yonsei, culminating in a featured session at 2022 GEEF. At Yale, Francis is involved with health systems and surveillance research-based in Malaysia, Armenia, and China, and also assists the Yale Institute for Global Health as a program fellow. Prior to Yale, Francis worked as a survey researcher under UC Berkeley’s Institute for the Study of Societal Issues and contributed to health technology and delivery studies at Massachusetts General Hospital and UCSF Medical Center.

Chaesub Lee
Director of ITU Telecommunication Standardization Bureau

Chaesub Lee has contributed ICT standardization for over 30 years, specializing in areas such as integrated services digital networks (ISDN), global information infrastructure (GII), Internet protocol, next-generation networks (NGN), Internet protocol television (IPTV), and cloud computing. Within ITU Dr. Lee served as Chairman of the ITU Focus Group on Next-Generation Networks (NGN) to address the growing need for international standards for NGN, including service requirements, functional architecture, mobility, security, and Quality of Service (QoS). He was also Vice-Chairman of the ITU Focus Group on IPTV which worked to coordinate and promote the development of IPTV standards. Dr. Lee holds a Ph.D. in Multimedia Engineering.

David Rolnick
Assistant Professor of School of Computer Science, McGill University

Dr. Khoshnood is an Associate Professor and Canada CIFAR AI Chair in the School of Computer Science at McGill University and at Mila Quebec AI Institute. He is a Co-founder and Chair of Climate Change AI and serves as Scientific Co-director of Sustainability in the Digital Age. Prof. Rolnick received his Ph.D. in Applied Mathematics from MIT. He is a former NSF Mathematical Sciences Postdoctoral Research Fellow, NSF Graduate Research Fellow, and Fulbright Scholar, and was named to the MIT Technology Review’s 2021 list of “35 Innovators Under 35” for his work on applications of machine learning to the problem of climate change.

Kaveh Khoshnood
Associate Professor of Yale School of Public Health

Francis Yang
Master’s Program in Public Health, Yale School of Public Health

David Rolnick is an Assistant Professor and Canada CIFAR AI Chair in the School of Computer Science at McGill University and at Mila Quebec AI Institute. He is a Co-founder and Chair of Climate Change AI and serves as Scientific Co-director of Sustainability in the Digital Age. Prof. Rolnick received his Ph.D. in Applied Mathematics from MIT. He is a former NSF Mathematical Sciences Postdoctoral Research Fellow, NSF Graduate Research Fellow, and Fulbright Scholar, and was named to the MIT Technology Review’s 2021 list of “35 Innovators Under 35” for his work on applications of machine learning to the problem of climate change.
Tsogt Mend
Master’s Program in Global Health Policy and Financing Capacity Building, Yonsei Graduate School of Public Health

Tsogt Mend is an epidemiologist of National Center for Communicable Diseases in Mongolia. He has been working in pandemic preparedness, response and evidence making for 4 years. He has come to the Republic of Korea to study Health Policy and Financing Capacity Building in Yonsei University.

So Yoon Kim
Professor of Health Law and Ethics, Yonsei University

So Yoon Kim, M.D., Ph.D., is a professor in the Department of Medical Law and Ethics, Division of Medical Humanities and Society, College of Medicine, and the Director of the Asian Institute of Bioethics and Health Law (AIBHL), Yonsei University, which is a WHO Collaborating Centre for Health Law and Bioethics, South Korea. The AIBHL is established to develop legal and ethical considerations for the health care sector in South Korea and around the world. Since 2002 the AIBHL has been leading the field of bioethics and health law by actively working on research in medical ethics, public health, medical disputes, and etc.

Her research areas include medical law, medical ethics, advanced biotechnology and clinical ethics, medical dispute, patient safety, global health, elderly health, and mental health. Prof. Kim is also the Director of Asia-Pacific Academic Consortium for Public Health (APMCPH) Korea Region Office, and the Vice President of International Cooperation Director of Korean Association of School of Public Health.

Albert Icksang Ko
Professor of Yale School of Public Health & Yale School of Medicine

Dr. Albert Icksang Ko is the Raj and Indra Nooyi Professor of Public Health at the Yale School of Public Health and Collaborating Researcher at the Oswaldo Cruz Foundation, Brazilian Ministry of Health. He coordinates a research and training program on urban slum health in Brazil that focuses on implementing public health responses to infectious diseases that have emerged as a consequence of rapid urbanization and social inequity. Dr. Ko and his team have mobilized research capacity in Brazil to investigate outbreaks of leptospirosis, dengue and more recently Zika virus infection and associated birth defects. Dr. Ko serves as a member of the WHO R&D Taskforce for Zika Virus and R&D Blueprint Working Group. During the pandemic, he served with Indra Nooyi as co-chair of the Reopen Connecticut Advisory Group and continues to advise Governor Lamont and the State on its COVID-19 prevention and control plan. Dr. Ko is also providing support to the Oswaldo Cruz Foundation in its evaluation of the effectiveness of COVID-19 vaccines in Brazil.

Sten Vermund
Professor of Yale School of Public Health & Yale School of Medicine

Dr. Sten Vermund is a pediatrician and infectious disease epidemiologist focused on diseases of low- and middle-income countries. His work on HIV-HPV interactions among women in Bronx methadone programs motivated a change in the 1993 CDC AIDS case surveillance definition and inspired cervical cancer screening programs launched within HIV/AIDS programs around the world. The thrust of his research has focused on health care access, adolescent sexual and reproductive health and rights, and prevention of HIV transmission among general and key populations, including mother-to-child. Dr. Vermund has become increasingly engaged in health policy, particularly around the sustainability of HIV/AIDS programs and their expansion to non-communicable diseases, coronavirus pandemic response and prevention, and public health workforce development. His recent grants include capacity-building for public health in Chad, molecular epidemiology for HIV in Kazakhstan, and COVID-19 vaccine studies in Dominican Republic and Connecticut. He has worked with schools and arts organizations for COVID-19 risk mitigation and institutional safety. He is a member of the National Academy of Medicine, USA.

Recently her new book, Caring Democratic State (2022), has been published. Caring Democratic State explores the philosophical background and the normative justification of a caring state and its institutional and policy design. It covers topics including the definition of a caring state, the political theory of care ethics, the comparison of caring state with a welfare state, care as a constitutional value and the shared public responsibility for care.

She also published Normative Policy Analysis (2016), which examines various public policies from a philosophical perspective. Normative Policy Analysis won the best academic book award of the year 2017 by the National Academy of Science.

In addition, she has co-authored and co-edited a number of books. A co-authored book, Critiques of Korean Multiculturalism (2016), which addresses the multicultural influence on Korean society and the critique against it, won the best book award of the year 2017 by the Sejong Books. Another co-authored book, Crisis and Vision of Contemporary Political Theory (2020) addresses the ideas of contemporary political theorists including Iris Young’s theory of justice and democracy. In 2018, she co-edited a book, Care & Fairness, which is a collection of essays on the theory and practice of care ethics and legal fairness.

Furthermore, she has translated a number of books on care ethics and democracy into Korean.

Nancy Folbre is Professor Emerita of Economics and Director of the Program on Gender and Care Work at the Political Economy Research Institute at the University of Massachusetts Amherst and a Senior Fellow of the Levy Economics Institute at Bard College in the United States. Her research explores the interface between political economy and feminist theory, with a particular emphasis on the value of unpaid care work. In addition to numerous articles published in academic journals, she is the author of The Rise and Decline of Patriarchal Systems (Verso, 2021), the editor of For Love and Money: Care Work in the U.S. (Russell Sage, 2012), and the author of Greed, Lust, and Gender: A History of Economic Ideas (Oxford, 2009), Valuing Children: Rethinking the Economics of the Family (Harvard, 2008), and The Invisible Heart: Economics and Family Values (New Press, 2001). She has also written widely for a popular audience, including contributions to the New York Times Economix blog, The Nation, and the American Prospect. You can learn more about her at her website and blog, Care Talk: http://blogs.umass.edu/folbre/

Joan Tronto is professor emerita of political science at the University of Minnesota and the City University of New York. A graduate of Oberlin College, she received her Ph.D. from Princeton University. She is the author of Moral Boundaries: A Political Argument for an Ethic of Care (1993) and Caring Democracy: Markets, Equality and Justice (2013), and Who Cares? How to Reshape a Democratic Politics (2015) and over fifty articles about care ethics. Her work has been translated into many languages, including French, Spanish, Italian, Portuguese, Greek, Japanese, and Korean. In 2015, she was awarded an honorary doctorate by the University for Humanistic Studies in the Netherlands and won the Brown Prize for Democracy. She served as a Fulbright Fellow in Bologna, Italy in 2007. She currently lives in New York City.
Taeyoon Choi is an artist, educator and organizer who works with drawing, painting, computer programming, performance art, and video. He explores the poetics of science, technology, society, and human relations. His projects were presented at the New Museum of Contemporary Art, Whitney Museum of American Art, Los Angeles County Museum of Art, Smithsonian Asian Pacific American Center, Van Alen Institute, Mr. Museum, Art Sonje Center and more. He was a fellow at Eyebeam Art and Technology Center, Lower Manhattan Cultural Council, Frank-Ratchye Studio for Creative Inquiry, Pioneer Works, NEW INC, Data and Society. He taught at the New York University, Parsons School of Design | The New School, The City University of New York and the University of Seoul. As a co-founder of the School for Poetic Computation in New York City, he helped build the school’s curriculum and administration. Now Choi is based in South Korea.

Kabsung Kim is a professor at Yonsei University. He is currently in charge of smart city strategy as a chief advisor of the Korean Smart City Special committee under the Presidential Committee on the 4th Industrial Revolution. He has participated in many private and public projects as a researcher and a committee member. He has published many papers focused on housing policy, location theory, and spatial structure. He teaches housing policy, urban planning, spatial analysis & location theory, economic feasibility study, and smart city at the Department of Urban Planning and Engineering. Currently, he is working as the Vice President for University Planning and Development at Yonsei University.
Keeheon Lee is an Associate Professor and Chair of Creative Technology Management at Yonsei University. His recent research has explored the economic and carbon emission implications of improving the efficiency of deep learning, how to design ethics frameworks for AI reference, and applications of AI to improve social sustainability in product design. He serves as a committee member of Design Factory Korea. Dr. Lee received both his MSc and Ph.D. in Information and Industrial Engineering from Yonsei University.

Jung-hoon Lee is currently professor at the Graduate School of Information, Yonsei University, Seoul, Korea. He is also the director of Center for Digital Transformation Technology Management & ISI Lab. Professor Lee’s recent research focuses on “Smart City”, with a specific focus on technology & innovation development with 4IR technologies. He is currently taking a leading role of PMO for national smart city R&D project particularly involving index development, service design based on crowdsourcing based citizen engagement and Smart Mobility (i-MoD) living lab project with Hyundai Motors. Prof. Lee was served as the first chair of Smart City Committee for Seoul Metropolitan Government and is also currently serving as an advisory member for National Smart City Committee, Republic of Korea.

Prof. Lee actively contributed his research works in academic journals. His paper on “Towards an effective framework for building smart cities” is one of the most cited articles in Technological Forecasting & Social Change. Based on this work, Prof. Lee’s center bi-annually publishes ‘Smart Cities Index Report’ and present at the Smart City Expo & World Congress since 2013. Prof. Lee also contributes several consulting & advisory services to global leading corporations including ARUP, CISCO, GSMA, SK Telecom, KT, LG U+, LG CNS and HYUNDAI Motors. He also worked as an external consultant for UN ESCAP and OECD and also training executive-level of civil servants around the globe including G20 and developing countries. Prof. Lee was visiting academic fellow at University of Cambridge and visiting scholar at Stanford Graduate School of Business.

JeongGil Ko is an associate professor in the School of Integrated Technology, College of Engineering at Yonsei University. He received his B.Eng. degree in computer science and engineering from Korea University in 2007 and received his Ph.D. degree in Computer Science from the Johns Hopkins University in 2012. In 2010, he was at the Department of Computer Science, Stanford University as a visiting researcher. From June 2012 to August 2015, JeongGil Ko was a senior researcher at the Electronics and Telecommunications Research Institute (ETRI) and he was an assistant professor at the Department of Software and Computer Engineering at Ajou University from September 2015 to August 2019. He is a recipient of the Abel Wolman Fellowship awarded by the Whiting School of Engineering at the Johns Hopkins University in 2007 and a senior member of the IEEE since 2017. He has served on the program committee for many top conferences in the mobile and ubiquitous computing field (ACM MobiCom, MobiSys, SenSys, IEEE PerCom in particular), and is an associate editor for several academic journals including PACM IMWUT. His research interests are in the general area of developing embedded and mobile computing systems with ambient intelligence.
Phil Baty is an international authority on university performance and strategy, with 25 years of experience in global higher education, including a decade (2009-2019) as Editor of the prestigious Times Higher Education (THE) World University Rankings and its derivative analyses. He is an award-winning journalist and a sought-after speaker, commentator and consultant and he currently leads external affairs activities at THE, the trusted global data and insights partner for the higher education sector.

Phil was the creator of the World Academic Summit and he oversees the team that organizes the summit and THE's extensive series of international events and awards, which now engage more than 40,000 university leaders, academics, business executives and policymakers annually. He tweets from @Phil_Baty.

Michael Rinaman is the APAC Managing Director of FleishmanHillard’s research organization, TRUE Global Intelligence, and leads Global Analytics. He is responsible for developing integrated, outcome-focused measurement across earned, paid, owned and shared media. His focus is on developing and implementing new research capabilities in core markets including Hong Kong, ANZ, China, Indonesia, Japan, Korea, Philippines, Singapore and Thailand. From developing new solutions in market, to integrating regional perspective into global strategy, he blends best-in-class research methodologies with local expertise.

In his role, Michael also consults on global analytics strategy for clients across a variety of sectors, including technology, healthcare, consumer, sports marketing, financial services and corporate communications. He has overseen planning, optimization and impact assessment for award-winning campaigns and reputation work for AB InBev, Bose, Corning, Johnson & Johnson, JP Morgan Chase, and Samsung, among others. He works to implement best practices in research and measurement for his clients, providing both quantitative and qualitative assessments of performance across communications and marketing activities. He specializes in traditional and social media measurement, digital analytics, primary research methods, paid media analysis, patient profiling and journey pathing.

Before joining FleishmanHillard Michael served as a Vice President at Hill+Knowlton Strategies, where he oversaw both measurement and inter-agency data integrations for the firm across the WPP network. Earlier in his career, Mr. Rinaman also served as a data analyst for Edelman.

Throughout his career, he has focused on strategic, data-driven consulting, using data to develop compelling narratives that allow clients to solve complex business and communications problems.
SPEAKER BIOGRAPHY

FRIDAY, FEBRUARY 11 at 12:30 – 14:00 KST

**FEATURED & SCIENTIFIC SESSION 9**

**Ports: An Opportunity to Harmonize Sustainable Development of Land and Sea**

---

**Moderator**

**Hyun Jung Kim**

Professor of Department of Political Science & International Studies, Yonsei University

Dr. Hyun Jung Kim is an Associate Professor at the Department of Political Science and International Studies at Yonsei University (Republic of Korea). Her main research fields are law of the sea, international institutions and interrelations between international law and politics. She published legal articles in Korean, English and French. Her recent journal publications are: "Third-party fishing in an unlimited area under the Republic of Korea-Japan Fisheries Agreement", Marine Policy, vol. 125 (2021), "What did the Republic of Korea and Japan mean by the term ‘joint development’ in their 1974 agreement?", Marine Policy, vol. 117 (2020).

Her multicultural research capacity is due to her academic background. She holds Doctor in law (University of Paris I Panthéon-Sorbonne), LL.M. S (University of Paris I Panthéon-Sorbonne and Korea University), and LL.B. (Korea University). She was also a lecturer of the law of the sea at the United Nations Regional Course in International Law for Asia and the Pacific (2018). She can be reached at hjkim23@yonsei.ac.kr.

---

**Jong-Gil Kim**

Vice President of Incheon Port Authority

Kim Jong-Gil is Vice President of Incheon Port Authority since June 2021. Most recently, he has been Executive Director of the Korean Association of Shipping and Logistics since March 2013 and has been Executive Director of Korean Society of Supply Chain Management since January 2016. He has also been Vice Chairman of Korea Academy of International Commerce, Inc. since March 2016 and has been Vice Chairman of Korea Association for International Commerce and Information March 2019. Kim won the Award from the Ministry of Environment in 2018, the Award from Prime Minister in 2015, and the Award from the Ministry of Knowledge Economy in 2011. Kim received his B.A in Business Administration from Dankook University and his M.A in International Finance from Graduate School of Dankook University and Ph.D in Logistics Management from Graduate School of Logistics in Northeast Asia.

---

**Taedong Lee**

Professor of Department of Political Science & International Studies, Yonsei University

Taedong Lee is Underwood Distinguished Professor, and Chair Professor at the Department of Political Science and International Relations, and Director of Environment, Energy, and Human Resource Development Center of Yonsei University, Seoul. Professor Lee’s areas of research include global and sub-national environmental politics and policy, NGO and civic politics. Professor Lee published his monograph, Global Cities and Climate Change: Translocal Relations of Environmental Governance, Politics of Energy Transition, and other Korean and international peer-reviewed journals.

---

**Noel Hacegaba**

Deputy Executive Director & Chief Operating Officer, Port of Long Beach, California, U.S.A.

Dr. Noel Hacegaba is responsible for managing the day-to-day administration and operations of the Port of Long Beach. Previously, he served as the Port’s Chief Commercial Officer and successfully managed the Port’s commercial operations during a period of significant industry realignment and led the recovery of its largest terminal following the biggest bankruptcy in shipping line industry history.

Dr. Hacegaba has more than 24 years of public and private sector experience spanning a variety of industries. Prior to joining the Port, he managed $200 million in contracts for a Fortune 500 company.

Dr. Hacegaba is a graduate of the University of Southern California, where he earned degrees in economics, business administration and urban planning.

He also earned his doctorate degree in public administration from the University of La Verne. He currently serves on the Boards of various industry and non-profit organizations, including the Marine Exchange of Southern California and the Intermodal.
SPEAKER BIOGRAPHY
FRIDAY, FEBRUARY 11 at 12:30 – 14:00 KST

Sun-Hee Lee
Professor & Director of Korean Program, Wellesley College

Sun-Hee Lee is a Professor of Korean at Wellesley College. She served as Chair of the Department of East Asian Languages and Cultures and East Asian Studies Program for more than six years and is also the Executive Officer of New England College Korean Educators (NEACKE).

Dr. Lee’s research areas include corpus linguistics, learner corpora, and discourse analysis. She has published books and articles on grammatical constructions of Korean, analyses of news media, and learner language, including “Corpus-Based Research and KSL,” Routledge Handbook of Korean as Second/Foreign Language (2020), A Frequency Dictionary: Core Vocabulary for Learners (2016), and Korean Classic Tales with Commentaries (2018, Translation).

While at Wellesley, Dr. Lee has developed a full-fledged Korean language curriculum and established new major and minor programs in Korean Language and Culture. She has led several projects developing blended learning resources and technology for language instruction, and in recent years, has initiated global language network programs including the Wellesley-Yonsei language exchange buddy program and the Wellesley-Konyang Cyber Korean mentor-mentee program.

Sukhui Lee
Deputy General Manager of Korea Marine Environment Management Corporation (KOEM)

Sukhui Lee got her Ph.D. degree in environmental engineering from the University of Seoul in 2008, and her major is a life cycle assessment of the municipal waste treatment processes.

She has been in charge of responding to climate change at governmental agencies and research institutes in Korea and Japan since 2001 and is currently working at the Korea Marine Environment Management Corporation (KOEM) as a Deputy General Manager.

She has expertise in greenhouse gases inventory and evaluating emission reduction policies, and recently led the project to establish a comprehensive plan for air quality improvement in ocean and port.

Jeon Hyong-mo
Director & Research Fellow of Korea Maritime Institute

Dr. Jeon Hyung-mo is Director of International Development Cooperation Center, Korea Maritime Institute since February 2022. Most recently, he has been Adjunct Professor of the Graduate school of International Studies, Pusan National University since September 2019 and has been Director of Ocean Industry Innovation Research Department February 2019.

Jeon received his B.A in the Department of Industrial Systems Engineering from Kyung Hee University and his Ph.D. in the Department of Industrial and Systems Engineering from Lehigh University.
Mark Peterson earned his bachelor of arts degree in Asian studies and anthropology from BYU in 1971. In 1973 he earned his master’s degree in East Asian regional studies from Harvard University and his doctorate in East Asian languages and civilization, also from Harvard, in 1987. He was executive director of the Korean-American Educational (Fulbright) Commission in Seoul, Korea, from 1978 to 1983. He joined the BYU faculty in 1983, and retired in 2018. Professor Peterson directed undergraduate programs for BYU’s David M. Kennedy Center for International Studies from 1996 to 1998 and coordinated the Asian Studies Program from 1992 until 1996. He is a founding member and the first vice president of the International Association for Korean Language Education (IAKLE), a founding member of the American Association of Korean Teachers (AATK), and a lifetime member of the Royal Asiatic Society—Korea Branch, which he has served as a board member and vice president. He was also elected chairman of the Korean Studies Committee, an office within the Association for Asian Studies.

Dr. Peterson is the author of numerous books, articles, and journal publications. He is a subject of a documentary film about his study abroad program in Korea and has been a guest lecturer on Asian/Korean subjects at universities and professional associations. Currently he has an active YouTube channel featuring programs on Korean History and Culture, the "Frog Outside the Well."

FEATURED & SCIENTIFIC SESSION 11
Remember Our Promise, Leaving No One Behind!
The Role of Civil Society to Achieve the SDGs

FRIDAY, FEBRUARY 11 at 15:00 – 16:00 KST

Moderator

In Han Song
Professor and Vice President for Student Affairs & Director of the Ban Ki-moon Center for International Cooperation, Yonsei University

Professor Song is Vice President for Student Affairs at Yonsei University and Professor in Health & Mental Health Welfare and Sustainable Welfare at the Graduate School of Social Welfare. He is working to implement the Sustainable Development Goals (SDGs) as Faculty Director of the Ban Ki-moon Center for International Cooperation at Yonsei University’s Institute for Global Engagement & Empowerment where Former United Nations Secretary-General Dr. Ban Ki-moon serves as Honorary Director. Other positions at Yonsei include Director of the Center for Graduate Education Renewal, Faculty Director of the Institute for Youth & Culture, and Director of the Convergence Academy at the Institute of Convergence Science. For global research collaboration, he is Visiting Professor at Vilnius University Faculty of Medicine, Lithuania. Dr. Song is currently serving the Korean Government on several national committees including Prime Minister’s National Committee on Suicide Prevention Policy, Evaluation Committee on Health & Medicine, and Advisory Committee on Gender Equality. In the private sector, he was a member of the Future Technology Research Group at Samsung Electronics. He received his Ph.D. from the University of Chicago where his interdisciplinary doctoral research topic was on the biological and social factors associated with women’s moods. His current research areas include the integration of health/mental health & welfare, health disparities, sustainable welfare, and convergence research methodology. He has published more than 100 journal articles and books internationally and domestically. He appeared on a popular lecture series show JTBC Distinguished Class, and as a columnist, he has written ‘In Han Song’s Perspective’ at JoongAng Daily, one of the most influential newspapers in Korea.

Daeshik Jo
Secretary-General of Korea NGO Council for Overseas Development Cooperation (KCOC)

Mr. Daeshik Jo is a Secretary-General of the KCOC (Korea NGO Council for Overseas Development Cooperation. He is coordinating 140 NGOs with 4 million members in Korea. Before he joined civil society, he was a career diplomat. He served as Ambassador of the Republic of Korea to Canada and Deputy Minister for Planning and Coordination of Ministry of Foreign Affairs (MOFA). With a profound interest in poverty and development in developing countries, he has extensive experience in both public sector and CSO. He holds a Master’s degree in Sociology from USC (University of South Carolina, USA) and his B.A. in Sociology from Korea University. He is married with two sons. The ROK Government awarded him an Order of Service Merit twice, in 2008 and 2013.

Joon Oh
Board Chair of Save the Children Korea

Oh Joon is an eminent Scholar of United Nations studies at Kyung Hee University in Seoul, Korea. He is also the Chair of Save the Children Korea and a board member of Save the Children International. Previously he was Ambassador and Permanent Representative of the Republic of Korea to the United Nations in New York from 2013 to 2016. During this time, he also served as the 71st President of the Economic and Social Council (ECOSOC) and as President of the Conference of States Parties to the Convention on the Rights of Persons with Disabilities (CRPD) in 2015 and 2016. Before that, he was Korean Ambassador to Singapore from 2010-13 and Deputy Minister for Multilateral and Global Affairs in the Ministry of Foreign Affairs and Trade in Seoul from 2008-10. The Korean Government awarded him an Order of Service Merit twice, in 1996 and 2006. In 2018, he received a Global Korea Award from Michigan State University in the United States. Rehabilitation International (RI) gave him a Global Presidential Award in 2016 in acknowledgment of his achievements as President of the Convention on the Rights of Persons with Disabilities. He also received the 2014 Youngsan Diplomat of the Year Award for his work on North Korean human rights issues. He published his first book in Korean “For Mica, Who Contemplates Life” in 2015. He received a Master’s degree in International Policy Studies from Stanford University in 1991.
Myung Hwan Cho
President & CEO of World Vision Korea

Dr. Cho is President & CEO of World Vision Korea. He was Professor at Konkuk University (1990-2020), Adjunct Professor at the University of Maryland Global Campus (1991-2016) and President of AIDS Society of Asia and the Pacific (2005-2009, 2015-2020). He holds a PhD in Microbiology and Immunology from the University of Arizona and a Master's Degree in Public Administration from Harvard Kennedy School. He also completed the Executive Certificate ‘Blockchain Technologies: Business Innovation and Application’ from the MIT Sloan School of Management. Dr. Cho’s work spans three platforms which include biotechnology, public health advocacy, and entrepreneurship-innovation sustainability. He was a visiting scholar at Stanford University where he worked, alongside Prof. Thomas Merigan and Nobel Laureate Baruch Blumberg, on HIV drug resistance. He endeavored towards decreasing the impact of the AIDS epidemic in the region. He co-authored ‘AIDS: Taking a Long-Term view’, with Dr. Peter Piot and the 2031 AIDS Consortium. He was an independent steering committee member of UNITAID, a global health initiative to end the world’s tuberculosis, HIV/AIDS, and malaria epidemics. He was the dean of the planning and coordination of Konkuk University. He also demonstrated expertise in entrepreneurship in the biotech industry as a co-Founder & co-CEO of Nexolbiotech Ltd., leading to the creation of Celltrion Inc. His research and humanitarian contribution have been duly acknowledged. Dr. Cho is recognized as ‘Man of the Year in Public Health (Ministry of Health & Welfare), ‘Best Teacher of the Year’ (Konkuk University), ‘Leading Innovator of the Year’ (Newsmaker), ‘The 500 Leaders for Korea Economy’ (Daily Economy Newspaper), ‘The Korea Creative Management Grand Prize Award (The Economy CEO-The National Assembly), ‘Man of the Year in Public Service’ (The Korea 4.19 Freedom-Peace Foundation), ‘The 2016 Global Faculty Award’ (University of Maryland Global Campus), and ‘Best Korean Leader of the Year in Life Science’ (Daily Yonhap News). Dr. Cho is a scientist, entrepreneur, and advocate.

Wonsik Yoo
President of Korea Food for the Hungry International (KFHI) & Vice President of Korea NGO Council for Overseas Development Cooperation (KCOC)

Wonsik Yoo has served as the president/CEO of Korea Food for the Hungry International (KFHI) since 2015. With his business background in the global IT industry, he has led KFHI to new heights, internalizing global standards and strategic management. Under his management, KFHI has received several awards and certifications for its transparency and accountability, reconstituting the credibility of nonprofits in Korea. President Yoo currently serves in several positions to reinforce partnerships in civil society. He is a board member of Charity Korea (2015–), the vice president of Korea NGO Council for Overseas Development Cooperation (KCOC; 2019–), and the chairman of Food for the Hungry International Federation (FHIF). He has also previously served as a board member of Make-a-wish Korea and Miral Welfare Foundation. Before joining KFH, President Yoo had a career as a professional CEO in the IT industry, managing major companies such as Sun Microsoft Systems Korea and Oracle Korea. He was also recognized as the Most Renowned IT CEO of the Year in 2015.

DAY 2

FEATURED & SCIENTIFIC SESSION 12
Healthcare Access in Rural Communities
How to Fulfill Essential Health Services Needs in Rural Communities: Perspectives of Local Physicians in Medically Underserved Countries

Dr. Nguku is an orthopaedic surgeon and co-founder of the Machakos Orthopaedic Clinic in Rural Kenya. Dr. Nguku and his wife left employment at a busy hospital in central Kenya 7 years ago to establish this specialized clinic so as to serve the people of the greater Eastern Kenya. They both consider themselves as missionaries serving within this community. Dr. Nguku has over 15 years’ experience as an Orthopaedic surgeon, having worked mainly in the fields of Arthroplasty and pediatric orthopaedic. He served as the first program director of the orthopaedic training program at the CURE Hospital in Kenya under the college of surgeons of east, central, and southern Africa (COSECSA). His passion is to see patients receive world-class orthopedic care irrespective of their financial situation.

Levis Nguku
Director & Orthopaedic Surgeon of Machakos Orthopaedic Clinic, Kenya

Speciosa Nguku
Anesthesiologist of Machakos Orthopaedic Clinic, Kenya

Dr. Pak graduated from Yonsei University College of Medicine and worked in the Faculty of Medicine, University of Calgary, Canada, researching triggering factors for Type 1 diabetes mellitus from 1984 to 1995. He then studied theology in Talbot School of Theology, Biola University, the U.S.A. from 1995 to 1998.

Dr. Pak served as a missionary in Mongolia and China from 1998 to 2005, teaching at Mongolian National University of Medical Sciences and China Medical University. Since 2005, he has traveled to many countries, such as India, Vietnam, Kenya, Tanzania, Ethiopia, etc., to carry out the mission programs of Yonsei Medical Mission Center and to teach medical students.

He then came to realize the need for teaching global health issues and training cross-cultural leadership to the next generations. He established the Yonsei Global Health Leadership Course from 2014 to 2017 with funding from the United Board. He is now the director of the Medical Mission Center of Yonsei University Health System.

Paul Choi is a medical missionary currently serving as the Director of the International Program of the Medical Mission Center at Yonsei University Health System. Paul spends his days mentoring students and faculty, including foreign medical professionals, as an adjunct professor in Pediatrics and the Department of Humanities and Social Medicine at Yonsei University College of Medicine. He values building partnerships and equipping individuals, particularly health professionals, to be holistic persons.

Paul has worked in cross-cultural ministry for more than twenty years. Starting in 1997, he served at the Mongolian National University of Medical Sciences and Yonsei Friendship Hospital in Mongolia. Paul has worked with local and international team members in various contexts and roles, including a pediatric specialist/consultant, a professor, and a general director. Since 2005, Paul has worked to develop medical education in Mongolia as a representative of the Yonsei University Health System. Paul has received numerous awards for his service in the development of medical professionals and to underserved communities in Mongolia by both the Korean and Mongolian governments.

Co-Moderators

Chin Yong Pak
Director of Medical Mission Center, Yonsei Institute for Global Health, YUHS

Paul Choi
Director of International Program, Medical Mission Center, Yonsei Institute for Global Health, YUHS

Dr. Specky Nguku is an anesthesiologist and co-founder of the Machakos Orthopaedic Clinic in Rural Eastern Kenya. She left employment at a busy hospital in central Kenya 7 years ago to establish this specialized clinic so as to serve the people of the greater Eastern Kenya. They both consider themselves as missionaries serving within this community. Dr. Specky Nguku has over 10 years’ experience as an anesthesiologist, having worked mainly in the fields of Regional Anesthesia and Pain Management. She is keen on mentorship and is always looking for opportunities to serve. Her passion is to create an environment where people can experience God’s love and seek him earnestly. Anesthesia is a great avenue where she is able to achieve this. Her desire is to see the clinic grow to a full hospital serving patients who don’t have much money.

Director of Medical Mission Center, Yonsei Institute for Global Health, YUHS

Paul Choi
Director of International Program, Medical Mission Center, Yonsei Institute for Global Health, YUHS
Dr. Gaspard Habimana is an awardee of the Avison International Fellowship, Pediatric Department, Pediatric Gastroenterology Division, Severance Hospital, Yonsei University Health System. He obtained MMed degree in Pediatrics and Child Health from the University of Rwanda in 2018, then worked as a Pediatrician at Byumba District Hospital, situated in a rural area, country of Rwanda. He has a special interest in Pediatric Gastroenterology, Nutrition, Clinical Research, and Medical Education. He is an active member of Rwanda Medical and Dental Council, Rwanda Medical Association, and Rwanda Pediatric Association.

Sin Sokheang is a Cambodian national who graduated from a residency program as an Ophthalmologist in Cambodia in October 2020. In the present, she is on a training as a retina fellow at Severance hospital, Seoul, South Korea. Before she came to Seoul for her fellowship program, she has worked at an organization which was located in Battam Bang province. She performed eye surgeries and participated with mobile teams from foreign countries. Her future plan after finishing her training in the Severance hospital for a year, she will return to her home country, and she wishes to work in Non-Government Organization (NGO) as an Ophthalmologist in the province. She hopes to utilize what she has learned as a retina fellow in her country and serve her fellow Cambodians as much as she could.
